We are authorized to acquaint the public
that the worthy and patriotic representative of
the County of Dublin, Sir Edward Newenham,
is on his return to this Kingdom, perfectly re-
instituted in his health, and is expected here in a
very short Time.

Letters from Bergen say, they have had such
blowing weather that upwards of ten ships
were lost, and several damaged; among those
lost were three English vessels, but their names
are not mentioned; the hurricanes extended
for many miles along the Coast of Norway,
and it is feared great damage is done.

Cork, May 9. This morning about nine o'
clock, the commissary to the Artillery was stop-
ped at Ball-Market and robbed of his gold
watch and some money, by the footpad who
has lately annoyed the Kinsale road. The
Commissary snatched his pistol at him, which
missed fire, and the highwayman said he had
a mind to shoot him for so doing.

SIR,
NOT having an opportunity of seeing
your paper for some time past, till yesterday,
I was not a little surpris'd that Dennis Tuomy
could think of imposing a Solution to the Que-
tion I propos'd in your paper of the 24th ult.
for an Arithmetical Investigation; I beg leave
to ask him how he could find, that the second
Number was five times the first, or the third
seven times the first; except the numbers were
first ascertain'd, or by an Algebraic Equation;
and even if this was possible, the Investigation
is still wanting; therefore his Method is evi-
dently erroneous. I would be much oblig'd to
Mr. Tuomy to reconsider the Question and give
an Arithmetical Solution, according to the in-
tent of it, and recommend him not to expose
his weakness by answering Problems too exten-
sive for his feeble Capacity; for it's grasping
at a shadow to catch nothing.
