However pleafed Sir Guy Carleton may feel meritorious conduct in every Department wherein he has been employed, his fenfations must still be more exquisite, when he reflects that he is returning to a country of which he is the Idol, and in which he did not leave a dry eye when he embarked for Europe ! When this worthy officer left Canada, the inhabitants, to teflify their grief for lofing him, and flow their zeal for his fuccefs, prefented addreffes to his Majefty, expreshing the bleffings they enjoyed when under the command of Sir Guy Carleton. The French inhabitants prefented an address, in their inguage, the Englifh inhabitants one in English, and the Magiftrates a third in French and English. What flattering marks of universal fatisfaction []] What an example to others I

Lieutenant Colonel O'Kelly will probably fucceed to the Weltminfter regiment of Middlefex militia. A noble Duke intimated to this gentleman, that the Premier was of opinion that Colonels of militia regiments should be in Parliament, to which the Colonel anfwered,-" O very well, my Lord Duke, then he shall foon fee me a Member."

of all militia regiments shall in future be members of Parliament, ftrongly evinces the fincerity of his Premiership's intention to reform the constitution of the Houfe of Commons, and allo his Whig principles, which lead to the diminution of Royal influence .- Should he carry this point, his next no doubt will be, to render a feat in Parliament a neceffary qualification for Colonels in the army ; and then should the fortification plan fucceed, the people will have the fatisfaction of being convinced, that the garrifons of the nation are under the command of their own reprefentatives, and of course that their liberties are fecure.

A very daring fpecies of undue influence has been practifed to oppose the borough reform in Scotland, which will be laid before the public when that measure comes to be agitated in the Hoale of Commons.

A DESCRIPTION OF THE PARTY OF T DUBLIN, April 29.

His Majefty has been pleafed to make the following promotions in the army on this eftablishment, and the commissions, dated the 3d of April, 1785, are come over accordingly, viz:

- 17th ditto, Mr. William Wells to be Cornet, vice Currie, refigned.
- 16th regiment of foor, Lientenant Hugh Wallace, from Britidi half pay of 16th foot, to be Lieutenant, vice Finnegan exchanged .----Mr. Edward Eyre White to be Enfign, vice Little, refigned.

A letter from Baltimore, dated February I at the extensive power given to him by the Su- 15, to a gentleman in this city, mentions, that vereign as a mark of Royal approbation for his in confequence of a mifunderstanding between the eccentric Mr. Mathew Carey, fome time fince proprietor of the Volunteers Journal in this metropolis, and a Mr. Olwald, of Philadelphia, they met near that city, and the former received a dangerous wound through the thigh, of which, however, he is in a fair way of recovery. Ofwald, originally a printer, was appointed a Colonel in the Continental ariny during the American war, but at the reftoration of peace commenced a paper in Philadelphia, Being rival publishers, some little bickerings in their respective prints gave birth to the dispute which terminated as already mentioned, in which Mr. Carey is faid to have manifetted himfelt in every particular a man of fpirit.

Duke of Rutland's Anna Liffey filly, carried all before her on Monday laft at the Curragh. His Grace had but little upon her, but the other betters were confiderable.

Large packages of linen and woollen are preparing to be fent out by the first thips that fail for Quebec and Montreal, from which markets those articles find a ready fale to the Americans on the back fettlements, where The Minister's declaration, that the Colonels | they continue to have a demand for British goods, in preference to every other whatever.

LIMERI C K.

Ma. CROSBIE has been fo obliging as to favor the Public, with the following account of his Aerial Voyage from Limerick, on Thuriday the 27th of April 1786.

After fo many and fuch very flattering teffimonies of approbation, which I have met with in this City, I fhould think mytelf wanting in duty and gratitude, if I omitted any Relation a laudable Curiofity. I shall therefore offer my humble tribute, which I hope may prove acceptable to my Readers.

The anxiety I laboured under, from the apprehenfion of any Accident happening in the Process of Inflation (which would inevitably prevent my Afcept.) obliged me to proceed with caution, and I fear trefpais too long on the obliging patience of my friends; as no more materials could be procured in town, it was neceffary to allow proper time for the operation, and to pay it that attention, which the goodnels and activity of the Gentlemen who slitted, enabled me to do. They will I hape accept of my grateful Thanks, and the Public admit this Fact as my apology.

Several gentlemen who have feen Lunardi, was determined to explore a higher Region. I Blanchard, Pilatre de Rofier, and other Aerial had recourse to a phial of strong Lavender travellers, agree that none of them afcended drops, which I drank off, without obferving fo well, or with fo much eclat, as Mr. Crofbie the firength of them; and though every humid did on Thursday laft .- When he was out of thing about me had been Frozen, the Lavender fight a fubicription was opened in the Comdrops and the bottle they were in, feit as unittee room of the Houfe of Industry by Sir warm, as if they had been at the hre. After using this precaution, I afcended to Richard de Bourgho, Bart. and Col. Smyth.

CROSBIE, with warmell Gramy Ears, from the dilation of the Cellular veffels, felt as if going to burft. My breath titude, returns his fincere Thanks to the Gentlemen who composed the Committee, for congealing on the initiant of reipiration, fell conducting his Experiment, for their great Atlike a light fnow, and collected on my lap as tention and readinefs, to undertake the trouble it dropped. A I had not taken any additional they must have experienced ;-allo to those covering but my loole gown, my feet and hands gentlemen, who were kind enough to contribecame intenfely cold, and my fingers cramped, but to my attonifhment, the difficulty of bute their offiftance, in the difagreeable and laborious Process of Inflation, and affures them, breathing gradually decreafed, and the pain in my Ears became lefs; these circumstances he will ever bear a grateful remembrance of added to my having now got into a current their conduct.
