Last Monday there was a very respectable meeting of Country Gentlemen, Merchants and Farmers, at the Thollet, for the purpose of taking into consideration the present low price of Beef, when a Subscription of above 1000l. was raised for carrying into effect the Resolutions then agreed to:—See Advertisement.

A Caution—The very existence of the poor depends upon potatoes; yet we too often see, thro' indolence and neglect, large quantities totally destroyed by frost. This season promises a continuance of hard weather, and it is earnestly recommended to all farmers to lay in, and carefully protect their crop.—It is hoped this caution will be promulgated to the illiterate poor, by their respective Pastors.

Potatoe Barm, which by long experience has been found the best for making good Bread.—Two pound boiled Potatoes, of the dryest kind, the more mealy the better, bruise them with a spoon till they become fine, then pour on them two quarts of boiling Water, by degrees stirring it with a spoon to make it mix smooth, put to it four ounces of brown sugar, after mixing it well, strain it through a hair sieve, when luke warm, add thereto four or five table spoons full of good solid barm, let it lie in a crock for two hours before the fire, till it ferments, stirring it occasionally, put it into a cool place for 24 hours.—One naggin of this Barm will serve four quarts of flour, the dough must stand nine hours in a warm place, before you make it into loaves for baking;—this Barm will hold good for two months.
