It is sincerely hoped, that the liberality of the Public, will be extended on Sunday next, at the Charity Sermons, to prevent the crowd of wretched Objects at present maintained in the House of Industry from being turned out—this is a Charity which embraces the poor of every denomination from County and City,—here no party prevails—no jobs arises to individuals,—and the House, which during the last year never contained less than 150 miserable wretches, including 30 Lunatics and Idiots, conducted and maintained at the small expence of about 30l. to a Resident Steward and Housekeeper:—if any person doubts the fact, the House and Books are open to their inspection; and as a proof that it is really an Asylum for the Distressed, there are not more than two objects who would go out, if the doors were thrown open.

By an account received this day from Brussels dated 7th inst. it is said, and that with firmness, that the Emperor was poisoned in his coffee, which he had no sooner drank than he was seized with violent pains of which he soon died.

When we take a view of the present state of the several Courts of Europe, we cannot but lament that Dr. Willis can attend only one at a time.

The Mary Ann, Smith, for this Port, was well at Deal the 15th inst.
