illied a few partifice of thele crimes, they conceal then felens; but I have token fuch meafures as will foon enable me with certainty to discover

I had the honour to icform you, that I had received intelligence of various bodies of rebels who were forming, in the idends of St. Thomas and Sr. Barrholomew, now plots against Guadaloupe. I have obtained certain information of this circumstance, by the return of the frigate in Didon, which I had dispatched to demand theie rebels to be given up, by the respective Gover-

port of their two colonies. Some veffels belonging to rebels, who had efcapet from Guedaloupe, and which were employed for keeping up a communication with their confidential friends in that Island, were there found. One of them had fill on board a finall quantity of ammunition, part of which they had thrown into the fea when they faw the Prench frigate approaching. But not withftandhad dot time to complete it when the frigate caft anchor chale to them. The brigands abandoned the vellal, and went to confecal themselves in the woods. M. de Waterfforf, Commandant of the Danift Mande, has given firiet ordere for their being arrefted. But at Spint Barthalomew, M. Hankerheim, the Governor, did not think himfelf auch rifed to purfue the fame fteps.

I fend you my correspondence with the Swedif Gosernor, in order that the Government may deliberate on the conduct, which the tranquillity of the colonies requires from all the powers of Europe ; -for it is not certainly the intention of the Swedish Government to give an afrium in its possessions to brigands, who, after having polluted with all their crimes the French colonies, hope to make preparations with impunity far the commission of new ones, in a beighbouring territory in friendship with the Republic .- Health and refpect.

(Signed)

LACROSSE.

ENGLAND.

SHEERNESS. Jan. 19 -- Arrived the fhip Cacon of 250 rons Frederick Sobelius, mafter, from London, bound to Alicant, in Spain, in ballaft, with the lofs of her cables and sochors, and otherwise injured. The Patrioent, Captain Beut Ograde, from London bound to Havre-de-Grace, in France, laden with indigo, linen, and other va'uable merchandize, has alfo been obliged to come into harbour for fafety, having loft two cables and anchors, and it is feared her eargo muft be taken out.

A great deal of damage has been done her by the late rempelluous weather; part of the wrecks of feveral veffels have been picked up. Seventy cubs of foreign Geneva have been washed up, supposed to have been suck by smugglers. The damage done by the oyster grounds is estimated

culty faved by their boat.

It is faid that the claims of his Royal Highorfs the Prince of Wales are adjusted to the fatisfattion of all parties, and that it will be proposed to Parliament, that Government shall take upon itfelf payment of the unliquidated balance of his Royal Highnels's debre, for which the deduction from his income, of 65,000l, per annum flands pledged, and which balance now smounts to about 240,000 and that his Royal Highness mall have the enjoyment of his whole income of 125,000l. per annum, for the purpole of reluming and supporting the splendor futtable to his The Special Commission, issued for the trial of

the perions concerned in the Oakley-Areer meeting, was opened at the New Selfions Houle, in Southwark, yesterday morning. After hearing one of the most able, impartial, and homes charges ever delivered by a Judge on fuch an occasion, from Lord Chief Juffice Ellenborough, the Grand Jury retired, and at a quarter patt eight o'clock in the evening returned a true bill against thirteen of the persons namely; Edward Marcus Despard, William Lander, Atthur Gra-ham, Thomas Broughton, Thomas Philips, Dav. Tindall, John Doyle, George Sedgwick Wratton, John Wood, John Francis, The Newman, Samuel Smith, John Macnamara. The Court then adjourned to the 5th of February, when the price foners will be arraigned; and on the 7 h their trial will commence.

LIMERICK, JANUARY 26.

On Saturday last, a man was found in a bogs near Creacora, County Limerick ;-it is supposed he was the accomplice of Ryan, otherwife Captain Lightfoot, who was thot on the night of the 2d inflant, in the act of fetting fire to Mr. Benfon's house, of Green-hill, and that he received a wound from faid thot, of which he also died.

At'a Meeting of the Common Council held on Monday laft, it was unanimously resolved to prefent the Freedom of this City, in a Gold Box, to the Right Hon. William Wickham, Chief Secretary to his Excellency the Lord Lieutenant.

Christopher Lysaght, of Woodmount, Esq. is appointed High Sheriff of the County of Clare, for

the enfuing year. The Lord High Chancellor has appointed Hickman Rofe, Efq; a Justice of Peace for the County

of Limerick. Last night a man of the name of John Toomy, went into the shop of Mr. Carroll, jeweller, to purchase a filver Crucifix, with which he ran off, but was purfued and taken by Mr. Carroll,-he this day underwent an examination before the Rt. Worshipful Joseph Sargent, Esq; Mayor, and was fully identified as the person who lately swindled Mr. Fitz-Gerald, Goldsmith, out of four Gold Rings, and five Guineas in Bank Notes.

The Chairman in addressing the Grand charged them to enquire into the state of the tire Baronies, which compose the western division of the County, as to the tranquillity or differband of those Baronies; and as he expected a full meeting of Magistrates on Monday, that they should the be ready to report to the Bench, the refult of the enquiry-and feeing a large concourse of the lowclasses prefent, he mentioned that he was authorise by General Payne, the Commanding Officer of the Diffrict, to offer 100l. reward to any person who shall give the General such effectual Information an intended unlawful meeting of 50 persons e upwards, as shall enable the army to come up with or furprife fuch affembly-and in the name of fe veral Magistrates of the County, he offered a Re ward (which he undertook perfonally to pay) of 2001. for the like effectual information given to any Magiltrate of the County, and to be paid in the forlowing proportions :- 50l. for any unlawful affembly of ten persons or upwards; 100l. for twenty persons or upwards, and 2001, for thirty persons or

Monday the 24th.

Prefent on the Bench, Gerald Blenerhaffet, Bolton Waller, Brudenell Plummer, Rev. John Graves, Rev. Thomas Weltropp, Thomas Odell, Michael Scanlan, Richard Harte, Henry Brown, Edward Lloyd, and Carroll Nath, Efgrs.

It being then reported, that there was no unlawful meeting or disturbance in Upper or Lower Connelloe, but that partial diffurbances had taken place in Kenry. The Chairman addressed the Bench-Gentlemen,

While I congratulate you on the relative traffquillity of this division of your County, I cannot recommend to you to overrate your fecurity. nature of disturbance, where it is not watched and presented, is rather to encrease than subside.

Difturbances of a venalious fort have lately taken place in feveral parts of the other division of the Courty, and there disturbances call for your viglance, because the tranquillity that is preserved is less espensive than the tranquillity that is reflored. A sector motive for vigilance arises from the name of the lower classes of the people of this courty, for our by their language from all the advertiges of cultrated Society; they full continue like the Indian n the Back Settlements, without more or religion, without any guide but their passes, and warbaut any restraint but their appearance those, therefore, not only the exercises of the Majistrates, but the union of all the bear classes is meessary, and for this purpose a splen has been engited with much deliberation, which a acted wow with proportional diligence, will asse only fecure me peace of this County, but may fe an example to the other counties of the kingdom.

This is ten I am this day to recommend to the Magistrass, Centlenen, Land-holders, and Famers of the Canty; a fystem, that while it hads out to the bear classes, the means of evinces their loyalty, and uniting in one common bond, to fupport the afterdancy of the Laws, will either guard against every movement of the lower classes, or render their motions more immediately liable to detection. And what adds, in my mind, to the value of this fyllen is, that it is conceived in the spirit, and bottomed upon the basis of our Constitution. The out of the fyftem is as follows :-That the Magistrates of every barony, should hole petty Seffions in their respective baronies once week, or as often as may be necessary, according to the state of the barony. That there should be four rolls opened in each barony for enrolling suc persons as are desirous to become members of the constitutional affociation. That those four rol should be for four respective classes; the 1st class paying two guineas, the 2d one guinea, the 3d ha a guinea, and the 4th a crown. That from the members fo affociated, a proportionate number Conflables should be appointed, to watch ever breach of the peace, to arend the Magistrates their petty fessions, to take up offenders, and
