the evolutions of attack, defence, and lastly of prudent retreat, could be more gloriously displayed than in this noble enterprize, they sallied forth, resolving by some strong measures to strike a panic into the enemy's camp—but, alas! it was otherwise: the Pikeman now felt he was in a good cause, and wielded the brawny arm with dreadful execution until he thinned the ranks of those would-be Turennes—the commander-in-chief left a gory monument of his prowess on the field of battle. The watchmen by this time had called in all their out-posts, and would have Burgoned this formidable band, did not the picket happen to re-inforce their vanquished brethren—this terminated the engagement, which whether we consider prudence in design, or execution in the field, is admitted to place the watchmen high in point of military reputation.—We lament that these few young gentlemen should belong to a neighbouring county of distinguished honor—if they are suffered to taroish it with impunity, it will be a matter of great surprise—educated as gentlemen, and bearing commissions, that they should attack men, appointed by act of parliament for the protection of that parish, is a gross degradation of these considerations—"for shame! these poor men are obliged to sacrifice every domestic comfort, their healths, for a poor pittance, and are they to be assaulted on their posts?" Should the meanest wretch in society, attack a centinel on his post, his life would be the forfeit—what can extenuate men of rank, when equally guilty.

A Subscription is opened, at the Office of this Paper, and by Jasper White, Esq. for the relief of the widow and orphans of Edmond Mulcahy, who was, it appears, unfortunately stabbed on Tuesday last, by Daniel Hurley, centinel at the top of Pump-lane.—This being a case of the greatest distress, solicits the benevolence of a generous and humane public. The smallest donations will be thankfully acknowledged.

The Ball given last night, at the Assembly-rooms, in aid of the Female Orphan School, was brilliantly and numerously attended, and we have seldom witnessed a larger concourse than met on this occasion, all prompted by the benevolent impulse of humanity.—Meek-eyed charity found many personifications in our beauteous town's women, who crowded the ball-rooms, and diffused universal gaiety and harmony. Much is due to the Gentlemen Stewards who promoted that order and regularity, without which, a promiscuous assembly is "confusion worse confounded;" and upon the whole, all appeared uniformly pleased and delighted with the mirth and hilarity which were the order of the night.

Our Theatre, to-morrow evening, we may anticipate, will reflect the same crowd of beauty and fashion that last night thronged our Ball-rooms, a similar object being still held in view—the relief of the wretched House of Industry.

We find by the last Gazette, that James Hill Phillips, Esq. of this city, has been appointed an Ensign in the 45th regiment of foot—a young gentleman whose active mind and honorable spirit must render him an honor to the service.

Last Sunday, Captain Wilkinson's Corps of Volunteers, and the Yeomanry of this City, under the command of Colonel Prendergast Smyth, were inspected by Brig.-Gen. Michel.

who promote Commutation, does that which can be suggested only by the most laudable and liberal motives. Upon the whole, these resolutions of the County Clare, must afford to every well-wisher of his Country great satisfaction; inasmuch as they prove, that there can be no doubt of the certainty of every County in Ireland coming forward with similar unanimous declarations, on the best mode of preserving internal tranquility.—We know that the noble conduct of the County of Tipperary, the Queen's County, and the County of Kerry, have produced a very general and strong sensation in England, and established in that part of the United Kingdom, a belief that something must and ought to be done for Ireland in respect to Tithes. The people of England are in the main, a just and liberal people; their only great fault is a facility in submitting to the contemptible fallacies of a most venal press; but if once they have an opportunity of understanding a subject, they seldom err; and it is for this reason, that it is particularly incumbent upon the several Counties of Ireland to shew by their unanimous resolutions, their opinion respecting Tithes, which, thank God, are documents which will defy all the talents of this profligate press, so generally perverted in calumniating and mistating the character and interests of this country—and afford the People of England accurate Information on the state of Ireland

Dublin Evening Post.
BIRTHS
