WATERFORD, FEB 25.—Mr. Barelay has delivered
two of his Lectures in Experimental Philosophy, to a
respectable audience as can well be assembled toge-
ther in any city—To these he had added a great variety
of the most astonishing exhibitions by means of his So-
lar Microscope. The power of this instrument will be
duly appreciated, when we mention, that it magnified,
to 6 inches in length and 3 in breadth, an animal 22,000
times less than the mites in cheese.
