FIFTY PER CENT.

May be saved by Insuring at the above Office. Policies falling due on the 25th March, will expire unless renewed on or before the 9th of April.

THOSE who Insure at the NORWICH UNION merely deposit the usual Premiums, and at the expiration of seven years, they receive back such part of the Premium as shall have been more than sufficient to defray losses and expences.

The very considerable annual increase of business with which this establishment has been favoured for 20 years demonstrates that the public begin to prefer this plan, to paying the Trading Offices an enormous profit on a small subscribed proportion of a large nominal capital. Indeed it would be to suppose conse- quences do not follow causes were it otherwise. Look at the list of Noblemen who are at the head of the Trustees, and would they countenance any but a libe- ral and sound system? And consider also Insurers pay no more (in the LIFE Department near 10 per Cent. less) than elsewhere—property is effectually se- cured, and a return of one half of the Premiums may be constantly expected every seven years—but what greater proof of its excellence could be adduced, than the contemptible anonymous writing and whispering hostility resorted to by its contemporaries.

The Stamp Duties paid by this Office in the last four years was in
