LIMERICK—TUESDAY, DECEMBER 2, 1816.

THE London Journals of Monday, Tuesday, and Wednesday have arrived since our last, and those of Thursday by Express—from which we have extracted every article worthy of notice. The Dutch Papers are to the 24th ult. The Dutch Commissioners and troops had arrived at Java. The latter had landed, it would appear, early in June, but the surrender of the colony had not taken place, and it was merely stated there was reason to hope it would be effected in the course of July. The colony had so greatly improved, and the inhabitants had attained to such a height of prosperity under the able administration of Governor Raffles, it was not expected that they would return to their old system without reluctance.

By the last arrivals from Java, accounts have been received of a successful and decisive action having been fought at Macassar, in Celebes, between the British troops stationed at that settlement and the armies of several of the Native Chiefs, in hostility with the European authority.

These accounts were brought to Batavia by the Honorable Company's cruiser Ternate, and it appears that on this occasion the whole of the disposable force at Macassar attacked the enemy on a very strong position, defended by fifteen redoubts, and flanked on both sides by perpendicular rocks, several hundred feet high. The whole of the redoubts were carried, and the enemy's General, Datu Chita, killed. We regret, however, to add, that our loss was great, Lieutenants Samuel Watson, Ashe, and Goding being wounded, and seventy four men being killed and wounded. The whole force did not amount to five hundred men, including marines and seamen from the cruisers, headed by Captain Eatwell, of the Benares, who were of the most essential service.

The French Papers are to the 25th ult. The reader may remember that the King in his Speech, on the opening of the Legislative Session, declared the production of the present year sufficient for the home consumption. We, however, subsequently find his Majesty permitting the importation of corn free of duty, and preventing its exportation; but now there appears a Royal Ordinance, of the 23d of November, directly promising a considerable bounty on the introduction of corn, and flour of wheat, rye, and barley. This would intimate, that the assurance held out in the speech was somewhat inconsistent with the actual state of the harvest; or it may be resorted to as a measure to tranquilize the public mind, which is evidently agitated by apprehensions of scarcity. Some serious disturbances broke out at Toulouse, where the populace were instigated to attack the persons charged with provisions and to regulate the prices of all agricultural produce. The magistrates and military, however, soon restored order, and severe proceedings have been undertaken against the rioters. These circumstances can, however, have little influence on the supplies in the markets, for France cannot draw much corn from the Baltic, while it is wanted in England, as our ports are more convenient for receiving it thence, and we can afford much higher prices.

The last London Gazette contains a Proclamation (See Advertising Columns) fixing Tuesday, the 25th of January, for the meeting of Parliament for the dispatch of business.

The Gazette also contains an Order of Council, stating, that the plague, which made its appearance and prevailed at Noya, has ceased, and therefore revoking the Order of Council of the 14th of February last, subjecting all ships and vessels liable to quarantine, and coming from or through the Mediterranean within the Straits of Gibraltar (although furnished with clean bills of health), to be treated as vessels arriving with suspected bills.

The charges and sentence of the Court Martial on the Hon. A. Stanhope are given in our first page. On this subject the *Morning Chronicle* says—"We understand he is about 21 years of age, and the certain other person alluded to in the sentence, is, it is said, a veteran gamester known in St. James's street, who contrived to entrap both Lord Beauchamp and Mr. Stanhope, and, availing himself of their intoxication, made one his instrument, and the other his victim."

man with whom she was contending, but he escaped with the same good fortune his father had experienced. In the meantime, the box, containing the money, dropped from the ruffian with whom Phelan struggled, and was instantly placed in a state of safety by one of his daughters. The result of this rather extraordinary occurrence was, that the assailants were beaten off by Phelan, assisted by his family, with the loss of a tooth, and after a most severe contest, but with the preservation of his property, even after it appeared to have become the hopeless prey of these freebooters. These circumstances may be relied upon; and the respectable source of our information justly observes, that Phelan's conduct on the occasion merits the approbation of every honest man in the country, adding, that he has always been esteemed as a man of the most irreproachable and industrious character. A postscript is subjoined to the account, which says, "Phelan fought like a lion, and ought, as a spirited character, to be rewarded;" and so say we, with equal fervor, and equal conviction of the propriety and utility of distinguishing, in the most prominent manner, every man who thus defends himself against the prowling and lawless depredator.—*Waterford Chronicle*.

He was naturally of the most conciliating manners, and his countenance was the faithful index of an honorable heart. Had he not been prematurely taken off, he would eventually succeed the Earldom of Huntingdon, being the direct heir to that ancient title, but his virtues have procured him a more permanent title in a better world.—Last Saturday, much lamented, after a tedious illness, Mr. Gallagher, of Ennistymon, apothecary.
