... busy, bustling, arduous Character.—Sir Charles ... Cropland, dressed and looked the Man of Fashion.—The ... argumentative and benevolent Sir Robert Bramble, was ... represented with all the effect of a Baronet of the old ... School; and honest Dobbins went through his business with ... all the rigidity of veteran accuracy.

The ingenuousness, generosity, spirit and sprightliness of ... Frederick, received an animated and gentlemanlike repre- ... sentation. The good nature of Farmer Harrowby was well ... displayed; and Stephen, with considerable comic effect, ... shewed a due disposition for military ardour. "The bit of ... quality troubled into decay" in the person of the Honorable ... Lucetta Mac Tab, was sustained by Mrs. Kelly, with stiff- ... old-maiden-conceitedness. Emily Worthington had a very ... pleasing representative in Mrs. Fitz-Henry; who, with a fine ... figure unites general manners; and is an ornamental Actress. ... K. the simplicity ruled Mrs. James's Mary Harrowby.

Want of time, as well as want of space, prevent us from ... performing the pleasing duty of minutely noticing the vari- ... ous talents of all the Gentlemen who appeared in the farce; ... but we cannot close this short and rapid sketch without pay- ... ing our tribute of approbation in this place to the zeal, abili- ... ty, and good temper of the Gentleman, who, after going ... through Corporal Fox, in the play, performed Murtien ... De'any in the after-piece, which he sustained with spirit, ... sensibility, and humour; and although the fatigue of the ... day of the night may have afforded him excuse for unneces- ... sary repetitions, yet, when his song was encored, it was re- ... iterated with alacrity.

The reputation Lucet. Worthington secured for himself in ... the Play was preserved in Captain Seymour in the Farce; ... and notwithstanding that Otiapod was transformed into Mr. ... Frost, still the versatility of his genius equally qualified ... him for the personification of either; and, in his scene with ... Caroline, the beams of beauty seemed to have a melting ... influence upon his icy age, so as to warm him into passionate ... expressions of endearment.

We hope that the success of last night's effort, will ... keep the Society in activity. The audience entered the ... House with benevolence, and retired with gratification.
