on Saturday he was embarked at
al at Chester.

ADMIRERS OF ANIMATED NATURE.

of the animated works of Nature, whether
most fierce and untameable, or the most gentle
o animal creation, a sight of Howis's grand
Living Birds and Beasts, must afford the
tion. In this unique collection, the specta-
e glance, can behold, as if brought together
Animals, the inhabitants of climates far
ch other—of climates, which, though far
less in the variation of their temperature,
s of their wilds and deserts differ in their
sities. When, in perfect security, we view
most sagacious and the most ferocious
without fear, we penetrate the den of the
see, only to admire his beauty, the trea-
when we approach, unconscious of danger,
all—when we dare, not only unawed, but
to observe the fierce Leopard—when, like
we feel no anxiety, though surrounded by
sters of the wood—in such circumstances,
mind is filled with admiration of the all-
n of a man, and inspired with gratitude
ficent Being who has endued him with those
s, by which he is constituted the paragon
