**THE MECHANICAL AND OPTICAL EXHIBITION,**

**AT THE ASSEMBLY-ROOM, CHARLOTTE'S-QUAY,** will be continually exhibited until next Saturday, April 6, 1823, when it will positively close.

**ALTHOUGH** no description can properly illustrate these wonderful Figures of Art, yet to convey to the Public, an idea of their variety, and of the intricate powers with which these Figures are vested, the following is a short Exposition:—

**A SUPERB MUSICAL LADY,**

Representing **IRENE ROXALANA**, who plays with the greatest precision **SIXTEEN AXES.** Every note proceeds from the pressure of the Fingers and Feet on the appropriate Keys, as a living Person, and is not motioned on by any other means. *The Mechanical Drawing and Writing-Master,*

**A JEWELLER ARTIST,**

**THE LITTLE SPANARD,** an Animated Dancer, whose movements are regulated by Music, to which she keeps time with critical and scientific exactness.

**AN OLD NEGROMANCER,**

Which may fairly be denominated the British Enchanter; for few of the fabled tales concerning the Art of these wonder-working Spas, in their prime Groves of Druidical Oak, where Magic Spells impinged, can ever be thought to exceed the astonishing realities of this self acting Pneumomaton.

**A BEAUTIFUL GOLD SERPENT, A SIBERIAN MOUSE,**

Set in Pearls, which surprise every beholder by its apparent natural sagacity and motion; running in every direction with all the velocity of a living animal.

**AN EGYPTIAN LIZARD,**

Of exquisite workmanship, composed of Fine Gold, set with Pearls. A pleasing piece of Mechanism, from each representation it exhibits of that Animal.

**AN ARABIAN,**

The minuteness of this piece of Mechanism is truly wonderful, being as small as Life, and so perfect an Imitation of Nature, as frequently, by its motions, to deceive the Spectator.

**A HUMMING BIRD,**

Which starts from a superb Gold Box, warbles the melodious notes, and returns to its concealment in the Box. The effect of this piece of Mechanism may be said, without exaggeration, to be astonishing; and for delicacy of workmanship stands unrivalled.

To which will be added a recreation in the SCIENCE OF OPTICS. AT THE END OF WHICH, A number of Figures will appear in a Rendezvous, and form a most extraordinary Performance called the DANCE OF WITCHES. The whole to conclude with a series of Mechanical & Optical FIRE WORKS. Doors open every Evening at Seven o'Clock, when the Mechanical Pieces will be repeatedly Exhibited until Nine, when the Curious will retire for the Optical Delusions, Dance of Witches, &c. at Five o'Clock. Admission 1s. 6d. each—Children under ten years of age, Half-Piece. The Rooms will be well aired with Fires.
