## The Limerick Chronicle

WEDNESDAY, JANUARY 11.

Mr. Philip Kirby, of Kildromin, was found drowned,  
on Sunday afternoon, in the Pond, at Ballisimon.—The  
Mayor having held an inquisition on the body, it appeared  
that the deceased, on his return home from this City,  
accidentally fell into the water the previous evening, and  
unfortunately perished.

We are concerned to announce the sudden death of  
Alexander Rose, Esq. at his seat Ballyasaban, in this  
County, on Monday—he left his house at the Crescent,  
that morning, in apparently excellent health, and it is  
supposed was seized with an apoplectic fit, which unfor-  
tunately terminated the existence of a most worthy and  
honourable man—he was many years a Captain in the  
Royal Navy, and a most efficient Magistrate of the  
County Limerick.

Several sheep belonging to different Gentlemen in the  
County Clare, have been strangled within the last week,  
it is supposed with the intention of procuring cheap  
meat in the market, at least this is the reason assigned for  
the practice.

Much confusion prevails in Cork from the want of  
the New Copper Coinage, to complete the assimilation  
of the currency.

The New Copper Coinage will be issued at the Jus-  
tom-House of Cork to-morrow, but there is not as  
fourth what is wanted at the present moment.

The branch of the Bank of Ireland in Cork has fur-  
ther extended the time for exchanging the silver to  
Saturday next.

On Friday, a shopkeeper in Ennis was summoned  
before the Magistrates, for refusing to give more than  
twelve pennies for a shilling, but pleading ignorance, the  
case was dismissed. With one or two exceptions, there  
was scarcely a shop in that town that did not retain a thir-  
teenth, out of the change they gave.

The Provincial Bank of Ireland has already formed  
branches of its establishment in the following places in  
Ireland:—Armagh, Athlone, Ballina, Belfast, Castlebar,  
Clonmel, Cork, Galway, Kilkenny, Limerick, Londonderry,  
Newry, Sligo, Waterford, Westport and Wexford.

are impregnated with silver, are at present working by
