

ordinans who are educated there, I think that it will be much better if their fathers and mothers would be of them. (Roars of laughter for some minutes) that I have made a slip—I meant their guardians. Jephson supported the views taken by the Hon. Jephson for Aberdeen upon this subject. George Murray contended that the system of military education adopted in this country had been very injurious until the foundation of the Military College, which is an eminently beneficial in its results to the discipline and information of the army. Colonel Dawkins said that he had derived great advantage from the education which he had received at the Military College. The instruction which he had obtained was of the greatest assistance to him when he first joined his regiment. Anxious as he was to relieve the distress of the people, he could not bring himself to think that this was an establishment that could be dispensed with.

WEDNESDAY, MARCH 3.

Monday evening, Mr Sergeant Blackburne received a commission appointing him the going Judge of Assize, on the Munster Circuit, and, with Baron Pennefather, the Learned Gentleman will open the Court at Ennis, to-morrow. The Dublin Papers say Mr Sergeant Leffroy has resigned his degree of the coif, in consequence of a junior Sergeant being selected before him as Judge of Assize. It is also remarkable that Mr Gould's claim, as second Serjeant at Law, was likewise overlooked on this occasion. This evening, Baron Pennefather and Mr. Sergeant Blackburne arrived here, and proceeded on their way to Ennis.

Total number of prisoners committed for trial at Spring Assizes, 1830—120.

Tuesday night a second attack was made by a strong band of Rockites on the house of Mr. Finnegan, near Maryboro, where the Police defeated them about a week before. Shots and missiles of every sort were discharged at the house, when Finnegan and two Policemen fired out on the assailants, and with fatal effect to three or four of them. Exasperated by this serious loss, the fellows rushed with desperation into the house in spite of every obstacle, and in a few minutes left Finnegan and the two Policemen mangled corpses!

County Limerick, a School to be established in the parish where he had resided, are lodged in the Provincial Hospital. Legacies had been paid away by the Trustees of the Hospital. (Mr. Hartney and Mr. D. Barrington were named.) He hoped the meeting would be for not enlarging on the melancholy state of his family to set about the erecting of a Hospital. (Mr. Barrington became much interested.) My Father, said he, was born in the City, he had been in trade amongst you, he had resided here for the work they have done, an offering of gratitude, and the competence elsewhere—(cheers) must be matter of indifference to him, supported, so that it is made available to the people—(hear)—That grace enabled them to carry on the business, also enable them to devise some maintenance. It was known to all, the Hospital for the reception of patients, containing 90,000 people, diseases not contagious. The County had given much dissatisfaction, the City patient is admissible there, even by Country Gentlemen, the Hospital have not been recognised by the persuasions, in the parish of St. John, suggested by himself before the erecting of his family, and they bore the expense, the vast utility of such an Establishment means of supporting an Hospital, and the first step was a bill to introduce it. The Secretary of the Hospital, Mr. Gunnell, had written to the Hospital Bill did not come without proceeding, and that notices are not necessary; after which he returned down to Limerick immediately to the objects of the Bill to the people. He intervened, and after that continued three weeks to his bed by illness, only risen the day before. The Bill should be read a first time so as to be in Session, otherwise it should be read were not filled up, and I ordered to be had, and one given to Mr Rice, at that moment was utterly ignorant of the Bill. Yet the circumstance has been interesting to individuals, and an opinion of prejudice against a quarter where the offence existed. How unworthy of this kind, to found a stepping-stone to the Bill. (Some voices cried out "Mr. Barrington protested he did not allude to the Bill.") The bill to this moment is an act, its clauses are filled up. Misinformation industriously circulated of a tax on turf, and 6*d.* 1*s.* and even 2*s.* to support the Hospital. He felt the people of Limerick to contempt, he believed they set too high a value on their valuable Representative, to permit himself to purposes so obnoxious. There was no General Hospital in the County of Limerick, where the sick and the poor could find relief. An Institution of this kind, to be supported by the public—and with this view a bill of 500*l.* to Mr. Murphy for a lease of the Quay, as a site for the Hospital, was to present this same Hospital to the poor of Limerick, without a penny ever, either immediate or prospective. Every subscriber of three guineas, and every doner of 1*l.* for life. There is no clause in the bill for remuneration. The Institution of the County and City Limerick Infirmary to be supported—(murmuring)—He had not out any clause repugnant to the interests of the people—(hear)—There is no salary
