**TO THE EDITOR.**

Sir—I have the happiness to congratulate the Electors  
 of this, my native County, that they now have in their  
 hands a great constitutional power, and I am sure they  
 mean to exercise it with honesty and discretion. The Can-  
 didates for their favour are all in the field—let the Elec-  
 tors then look carefully to their own interests, and vote  
 for no man unless they have a distinct and specific pledge  
 from the hustings, that he will not support that Minister  
 who will propose the imposition of new taxes upon this  
 impoverished country. I am, Sir, your obedient servant,

*New Edition of the Encyclopædia Britannica.*

The first part of the New Edition of this great and  
 valuable work has just been published, and its appearance  
 such as must give entire satisfaction to the subscribers  
 of the public. It is handsomely printed on a superior  
 paper; the plates are well executed; and the articles are  
 written with the care, research, and scientific skill which  
 is to distinguish such a work. The high reputation  
 of the former editions will no doubt be more than suf-

ficient. The eminent writers who contributed the articles  
 to the Supplement, and several others, are engaged, under  
 the supervision of Napier, in revising, correcting, and re-modell-  
 ing the Encyclopædia; and it will combine all the merit  
 of the old work, with all the scientific lights of modern  
 science. We are glad to see that Sir James Mackintosh is  
 to contribute a Dissertation on the Ethical Philosophy of  
 the 17th and 18th centuries as a continuation of the  
 Preliminary Discourse of Dugald Stewart,  
 published in the Supplement.—*Leeds Mercury.*
