The fine coppered Ship, SIX BROTHERS, J. Chap-

sail again for the above port, on the 11th of April next—
wind and weather permitting. This Vessel sails remarkably
fast, and is, in every respect, a most desirable one for
Passengers; and as she cannot take to the United States but

paid by their friends in America, an early application is
necessary for such as intend to avail of this opportunity.
Apply to the Master on board; or to WILLIAM WHITE,

SEED, of said vessel.

Pen-Mending Totally

Superseded.

"His (Mr. Perry's) Pens are inimitable!" *Athenaeum.*
THE PATENT PERRYAN PENS, Warranted NOT
to require Mending, and to Write BETTER than any
other Pens whatever. AS CHEAP as the Common Pen.—
Price—per Packet, (containing nine Pens,) 3s. 6d. In order-
ing them, it is necessary merely to say whether Fine, or
Broad Points, are preferred. These Pens may be tried and
obtained at all Booksellers, but particularly at Mr. JAMES
GURIN'S, Fancy Warehouse, Limerick, the regular Agent
for the Pens, from whom, and the Booksellers, Prospectuses
may be had, gratis. Pens are consigned on Sale or Return;
for terms, apply (postage paid) to Mr. Perry, (the Patentee),
37, Red Lion Square, London.
* * * An opinion of these Pens, in an extract from the
Morning Chronicle, appears below.
Through the above medium may also be obtained, the
following—Perry's Packet of Perfectionated Letter Paper,
distinguished from all former kinds by its increasing the dura-
bility of pens of every sort, and by numerous other valuable
and exclusive properties, price 1s. 4d; and of Note Paper,
gilt or black edged, price 10d. Each packet contains a
quire. Also, Perry's Ink-stand Powder, from which is immedi-
ately produced, a deep and permanently black Ink, that
preserves the durability of the Perryan Pens and of all others,
reduces the frequency of dipping, sooner dries, and with
which, all writing is performed with increased despatch.—
Price, per Packet, 1s. The advantages of the Ink-stand
Powder will be more perceptible, if used in conjunction with
the Perfectionated Paper. All the above Packets are sealed,
and have the same signature as the Patent Perryan Pens.
(From the *Morning Chronicle* of Nov. 26th, 1830.)
PERRYAN PENS—Having obtained a supply of these pens,
and given them a fair trial, we are enabled to state, that we
have found them far superior to the common pen, and to all
substitutes which have yet been offered for it, that we have
ever before attempted to write with. This valuable inven-
tion, indeed, at once expunges both the numerous imperfec-
tions of the common pen, and the scratchy cutting effect of
all the metallic pens. We are therefore, inclined to think,
from the decided advantages which it affords the man of busi-
ness, or of literature, in common with the finest writer—
first, in the time it saves him in mending pens; secondly, in
the increased despatch with which it enables him to proceed;
and, thirdly, in the additional clearness, uniformity of ap-
pearance, and beauty of the writing which he produces by
its means—that there can be little doubt that the Perryan
will shortly be used to the exclusion of all other pens, by
every writer whose time is of any value, or with whom super-
ior writing possesses any importance.
