## MURDER AT BILBOA.

Another victim has been added to that hecatombe of suf- ferers, which this lawless district has sent to their last ac- count. Michael Griffin expired on Thursday morning at the County Infirmary, from the effect of three gun shot wounds in his thigh, inflicted while he lay fast asleep on his straw pallet, in a cabin at Bilboa, with his son and wife.— The circumstances of the attack appeared in our last. On Monday the Mayor proceeded to the County Infirmary to hold an Inquest on the body of this unfortunate man, and was assisted by Thomas P. Vokes, Esq. Chief Magistrate of Police. A Jury having been impanelled, Martin Griffin, son of the deceased, was sworn and examined. On the night of the 31st of August, he was in bed in the same house with his father, mother, and brother, when, two hours before cock-crow, he was alarmed by hearing a shot fired, and the cries of his father; the shot was fired into the house through the door, and the bed lay opposite it; immediately after heard another shot fired outside the door; it was the first shot struck his father, and it grazed the legs of his brother, who was in the same bed; there was no noise or signal given before the shot was fired; in half an hour after the door was opened, and a written notice found outside on the ground, it was brought in and read by the light of the fire. The notice was, that we should suffer death if we did not drop what we had in view—we were at this time herding on the farm under Mr. Wheeler—Ryan was the man who occupied it, and he was under notice to quit, though he still continued on the farm; the house was in a bog, and the country lonesome.

Mr. Vokes here explained—Some years ago one Ryan, a wealthy farmer, held a large district of Bilboa under lease from Lord Stradbroke, and he took in several score of under-tenants upon the land, so that when his term expired, the estate was covered with poor occupiers. Mr. William Blood, his Lordship's agent, who was murdered the other day, re-let the ground to those in possession, but it was of no use, and he was obliged to forgive them heavy arrears of rent before he could get them out, in fact they absorbed the proceeds of the whole estate to themselves and their families, in fact Mr. Blood forgave them some years of arrears before he could clear the ground. They returned again, and he was forced again to put them out. When a respectable or wealthy farmer proposes for those lands, and attempts to lo- cate himself, those people are sure to frighten him out by threats and intimidation, conceiving that any other but them- selves are usurpers of the soil. Mr. Wheeler tenanted a farm on it, and he was shot for doing so. Mr. Beary, another respectable tenant, commenced building and improving on the estate, and he was served with a Rock notice to give up, or else —! The whole estate of Lord Stradbroke in this district contains 13,000 acres, the people in that part of the country are all Ryans and Kennedys, and will suffer none but themselves to occupy it—thus preventing any person of respectability from living there. I have had liberty from Lord Stradbroke to build a Police barrack there, and I am determined to go on with it, notwithstanding the systematic opposition which is offered by those persons. A whole family (the Connells) were immolated on this property a few years ago, all arising from the same cause. The mason employed to superintend the barrack has this week received an incen- diary notice, that if he would dare build a barrack for "Police or Proctors," he should suffer for it.

Witness resumed—His father bawled out the instant the shot was fired; I thought and said it was the Police, when the noise was heard outside; I saw the wounds; he was per- fectly helpless in consequence, and was brought into hospital the second day after.

Surgeon John Wilkinson sworn—The deceased Michael Griffin was admitted into the hospital on the 2d inst.; he had three wounds in his right thigh, produced by shot from fire- arms, and he died this morning in consequence of them.— This leaden ball was extracted from the principal wound, it is flattened to the centre by striking against the thigh bone, and I'm surprised it did not break it; a bit of flannel cloth was found with it in the wound.

The Jury now proceeded to view the body, which pre- sented a most painful sight. They found a verdict of wilful murder against person or persons yet unknown.

In consequence of information received by the Reverend George Vincent, that a riot was expected to take place at the fair of Shanagolden, on Monday, Mr. Smith, Sub-In- spector, and thirty of the Police, arrived there about one o'clock, and stationed themselves on an eminence command- ing a full view of the fair, where they remained until after six o'clock in the evening. There is no doubt that if this precaution had not been taken much blood would have been spilled, and perhaps lives lost. It was quite evident, that Mr. Vincent's information was correct, for about 4 o'clock, when the "Mountain dew" had been liberally given and received, the contending factions were to be seen at a dis- tance marshalling their forces for the battle, where they re- mained for more than an hour in deliberation, but the ap- pearance of the Civil force in a commanding position quite contiguous, completely intimidated them, and they at length withdrew.

On Friday, in the middle of the day, two men attired in women's apparel, went on the lands of Stonehall, in the Barony of Bunratty, the property of Arthur Gloster, Esq. fired shots and drove off the persons engaged in mowing.

A boatman, named John Caaty, was found drowned at the quay of Kilrush, a few days ago. He was in a state

The Rev. Mr. Smith is appointed to the living of Killeacle, diocese of Killa and the Rev. Mr. Langford, to O'Brien's Bridge.

The Rev. Henry Cholmondeley, has addressed a farewell admonitory letter to his tenantry in the County Wexford, on his return to England.

The Lord Bishop of Ferns is at Leamington, and perfectly recovered

It is now stated that a relative of Lord Carlisle is to be the Archbishop of Dublin, and a son of the Lord Chancellor (Plunkett) is to be Bishop of Killaloe.

The copies moved for by Sir John Newport, and then or- dered to be printed, of the case and opinions of Law Officers of the Crown in Ireland, on the subject of re-valuation of Benefices to the First Fruits Fund, as taken on an Address to his Majesty of the 14th of last March, have been deliv- ered to the Members. The opinion of those Officers, Mr. Attorney-General Blackburne, the Solicitor-General Cramp- ton, and Mr. Greene, is, that no power now exists in the Crown to direct a re-valuation of Benefices in Ireland already valued for the levying of First Fruits.

There was a meeting on Monday last, where the Right Rev. Doctor Ryan presided. A Committee was appointed to devise means for promoting the interests of the St. Clare Female Poor School.

A Conference of Roman Catholic Clergy is now being held in this City. The Right Rev. Dr. Egan, of Kerry, has arrived in town.

The handsome bridge of one large arch now building on the site of the Old Baal's Bridge, makes rapid progress under the superintendance of that eminent professional gentleman, Mr. Paine—The two main piers of cut-stone are completed, and great progress is made in turning the arch itself, which has already advanced within a few feet of the centre of the river. The wonderful rapidity which has marked the progress of this undertaking is highly creditable to Mr. Paine.

A Union has been formed between the Limerick and Western Yacht Clubs, which from the zeal displayed and the attachment evinced to those useful institutions, and the rapid increase of members and subscribers, it is expected will be of mutual advantage, and that the next summer will be a gala season for those delightful exhibitions of which we have no doubt Tralee bay, and the Shannon will, in its turn, be the theatre. Many spacious bays and harbours on the coast of Kerry, are peculiarly well adapted for such scenes of manly and rational amusement.

Mr. Charles Williams has made a report to the Marquess of Downshire on the state of the river Shannon, both as to its navigation, and the drainage of the adjoining lands. He says the works on that branch of the river between Lough- derg and Loughrea, are in a state of great dilapidation, bridges, canals, locks, beacons, buoys, and trackways, decayed or destroyed. He says he had to pay half the cost of the reconstruction of the bridge at Banagher, and the en- tire cost of reconstructing the draw-arch of Portumna bridge, so as to pass steam vessels. He observes that the neglect of the Government of their own works on the Shannon, justifies the Grand Canal Company in a similar neglect of their de- partment. He says the project of lowering the waters of the Shannon, to drain certain lands, may risk the destruc- tion of 100 miles of useful navigation.

A woman named Horan was killed in the streets of Tip- perary a few days back by the Limerick Coach running over her.

A countryman was killed near Bruff on Monday night in a fight.

At a meeting of the subscribers to the Askerton Dispen- sary, lately held for the purpose of electing a Physician in the room of Doctor O'Sullivan, who had quitted the country, Doctor Shiel, after declining the situation on account of his many other engagements, resigned the office he had previ- ously held of Inspecting Physician, lest he should at all interfere with any arrangements the friends of the Institu- tion might think proper to make—for which conduct he was considered entitled to a vote of thanks, which was unani- mously agreed to and presented to him. Doctor Patterson was appointed to succeed Dr. O'Sullivan for the remainder of the present year.

## TO THE EDITOR.

SIR,—What was my surprise yesterday to see boat loads of stones and rubbish, from the Wellesley Bridge Works, thrown into the narrow space which intervenes between the docks and the bridge, thus putting an effectual bar to the navigation of that part of the river, difficult enough as it has been this long time past. How, Sir, now can vessels of any burden attempt to navigate that dangerous pass in ap- proaching or leaving our quays? This nuisance, I under- stand, was committed on the public by persons in the employ of the Contractor of the Wellesley Bridge Works. What will our Merchants say to it? The Bridge Act requires that there must be always "a safe and open passage" for vessels in this part of the river, where those interminable works are dragging the slow length along. But what is the case at present. A common turf-boat will scarce venture up and down it! The Act of Parliament has been expressly vio- lated by this outrage, and a most serious injury done to the navigation of the river. I leave the matter now in the hands of the Commercial men of this City, whose interests are most concerned.—I am, Sir, your humble servant,

A CITIZEN.

P. S.—The Docks were undertaken to be finished in 1827, and the Bridge in 1831.—How far are we from this?
