ROYAL GYMNASIUM,
CATHERINE PLACE, PERY SQUARE, WEST, LIMERICK.

Monsieur Huguenin

TAKES leave to inform the Nobility Gentry, and the Public in general, that the classes in his Gymnasium continue as usual. As the Public must be well aware that by the means of Gymnastic and Kalisthenic exercises many physical defects have been removed, which surpassed the skill of the most eminent physicians. Shoulders, differing in height by two inches, have been perfectly restored to proportion by the use of a newly invented exercise, another invented by Mr. H. has completely cured a very bad case of spinal disease, both diseases which youth, especially females, have a tendency to, owing to their sedentary habits. A young Lady whose growth had been stopped for three years previous to her being placed under Mr. H's care, grew two inches and a half in the short interval of six months. A young man labouring under a vertigo, so violent as to render him incapable of attending to his business for two, three, and often four days in the week; having found every remedy ineffectual, a very eminent and respectable physician of this city sent him to the Gymnasium, and he left that valuable Institution after his quarter being ended, perfectly restored without taking any other remedy than the gentle and gradual diversions of the Gymnasium superintended by Mr. H.

If the limits of an advertisement would admit, numbers of similar bad cases that have been cured by those exercises, could be mentioned; many came to the Gymnasium having more the appearance of walking on stilts than on their feet, so weak were their lower limbs and back, others knocking their knees and turning in their toes, and have left it with a firm, open, free and graceful deportment; even those who do not labour under any of the evils here mentioned, may reap the greatest benefits from these exercises, as they not only remove established diseases, but act as preventatives to disease—such as gout, rheumatism, consumption, and numberless others. Mr. H. thinks he could not adduce a better proof of their value, than to give an estimate of the flourishing state of Monsieur Huguenin's Gymnasium in the metropolis, where the arts of Medicine and Surgery are so well known and practised: there the pupils are increasing in numbers from year to year; last year there were fifty more than the year before, and this winter there are already a hundred more than the last, though the best season is yet to come, and that number amounts to no less than five hundred. It is not children alone who practice those exercises there, but grown up Ladies and men between forty and fifty years of age, the example being shewn by the faculties themselves.

Monsieur Huguenin, ci-devant residing Tutor at Lord Chichester's, continues as usual to teach French, and Italian to private families and schools.

As the Gymnasium is occupied but two hours in the day, Mr. H. would let it either for a musical or dancing academy. Mr. H. can be seen at the Gymnasium every day between three and five o'clock.
