I have many other matters to direct your attention to, and some interesting facts to communicate, which I must reserve to my next. I cannot, however, avoid remarking upon the state of the weather here. We had, during the last week, at intervals, a high wind, but accompanied with very little rain. Not so in the Northern parts of England, where it blew a perfect hurricane, and the rain descended in such torrents as to occasion great loss of life, and vast destruction of property. St. Thomas's day (21st) was as fine as could be desired in October, and yesterday the sun shone forth brilliantly, and the heat was so great as to make it uncomfortable to persons within doors! This seems strange, but so it is.
