Teachers must be responsible in their classes; if, we repeat in other words, the College overlooks that chaste and holy lamp which is the hope, solace, and joy of human nature, and whose undying light, directs our faltering path through this life, unto the presence of Supreme Power, goodness, and wisdom in the everlasting world, endless error will assuredly arise, vicious habits and criminal propensities must be engendered; and then what follows? The youth of our native country are put to sea in a frail bark, without chart or compass, to navigate a boisterous and fathomless ocean, wherein they must irrecoverably perish without a spark of that heaven-born knowledge so indispensable to our happiness here, and our salvation hereafter.
