LIFE ASSURANCE.

THE system adopted by this Corporation combines the principle of Mutual Assurance with the security of a large subscribed capital, and the support of an influential body of Proprietors.

The Premiums charged by this Company have recently undergone a careful revision, and being modified and adjusted with reference to the extended and valuable information which has been obtained of late years, in regard to the probabilities of life, and are throughout rated as low as appears to be consistent with safety.

In addition to the ordinary uniform rates, Tables of ASCENDING and DESCENDING PREMIUMS have been deduced from the same data, to suit the objects and convenience of parties.

For another Class of Insured, Premiums have been deduced, making THE SUM INSURED PAYABLE ON THE PARTY ASSURING THE AGE OF SIXTY, OR AT HIS DEATH, IF IT OCCUR SOONER.

Advances are made by the Company on its Policies to the extent of their acquired value, whereby to that extent the Premiums paid become deposits, on which the assured can draw as required.

Loans to larger amount are made to Policy holders on approved security.

Persons resident in the country can effect insurance by corresponding with the Manager or with the nearest Agent.
