Improved Piano Fortes. MUSIC ACADEMY BEDFORD-ROW.

April 25.

MR. VICKERS

AS great pleasure in announcing that he has just received per the Alarm" a magnificent specimen of the New Grand square Piano Forte, with the this being the FIRST of this NEW GRAND ACTION description of Instrument ever imported to this part of Ireland; the superiority of which both as to great power of tone, durability of action and extreme elegance of appearance, has been universally admitted. Also a very superior Cortage Piano with check action. These Instruments from the House of Allison and Allison, Wardour street, Joho, London, have been specially manufactured for Mr V. under the immediate superintendance of the above eminent makers. Mr. V. being the first to import these beautiful instruments to this city, is determined to hold out such inducements to the Public as will insure their patronage.

From the speedy sale and great satisfaction given by those already disposed of, Mr. V. has no doubt but their great superiority will be fully appreciated.

Mr. V. is in daily expectation of a further supply. April 22.

Improvement IN PIANO FORTES.

ALLISON & ALLISON,
UBMIT their NEW GRAND SQUARE PIANO
FORTE to Public inspection, and feel assured that their incessant efforts to bring the Instrument to its present high degree of perfection, will be appreciated by all to whom the mechanism of the Piano Forte is familiar; and that, to those unacquainted with its general structure, a comparison between the Piano of ordinary construction and that now offered by A. & A., will immediately demonstrate the superiority of the Yew Grand Square Piano Forte, of their exclusive manufacture. Among the various improvements introduced by A. & A., an entirely new mechanism, upon the principle of the "Horizontal Grand Piano Forte," has been substituted for the clumsy hinge of leather and vellum hitherto employed for the hinge of leather and vellum hitherto employed for the hammers and leavels and a centra adopted, of which an extreme elegance and finish in the workmanship is no slight claim to distinction, but which induces a thorough accuracy and uniformity of operation, so incalculably advantageous in the consideration of an Instrument's wear and tear, as fully to warrant A. & A. in their conviction that hubic experience will establish their claim to public confidence, and that the Instrument now brought to perfection in their Manufactory, will be found to combine, with an unprecedented volume of tone, an elasticity of touch, and durability of action, never before attained in Piano Fortes of this description.

Allison & Allison have farther to state, that they

Allison & Allison have further to state, that they have applied the Grand Check to Cabinet, Cottage and Michricordan Piano Fortes, thereby obviating the inefficiency of touch and instability of Mechanism consequent upon the great vibration of the Hammer, so long the characteristic evils of upright Piano Fortes, and that they have succeeded in removing the cause which has heretofore prevented the introduction of these, the sweetest as well as most elegant of Instruments, into general use.

An assortment of the above Instruments, from the Manufactory of A. & A. 49, Wardour-street, Soho, London, are now received by Mr. VICKERS, at his MUSIC ACADEMY, 3, BEDFORD-ROW, April 22. LIMERICK.
