JOS. & JAS. MARSHALL, Auctioneers,

Who respectfully remark, that the DEVON Cattle are some of the handsomest of their class, and worthy of more than common attention .-The DURHAMS are pure bred and superior milkers. The crosses between the Durham and Devon's, of which there are two generations, cannot be surpassed for thrift, quality or hardiness, without excessive size. The Ayrshire's are imported from Cunninghamshire and are handsomely marked, hardy stock. The sheep are bred from the far-famed stock of Mr. Smith, of Dishley, and possess quality rarely to be found with grass-fed stock, they are LARGE LEICESTERS of the best blood in England, giving wool, thrift, early maturity and hardiness, with SIZE, seldom found, except with forced fed Stock.

Part of the beautiful flock of Rams will be hired by Auction; the remainder sold.

This Sale is less important in extent than many others, but as far as regards perfection in the respective classes of breeding, more important than any the Auctioneers have had the honor to notice recently: 3 SaL August 1.
