A strict investigation of the affairs of the Company
has been made for the five years ending 31st De-
cember 1841; and of the Profits thereby ascertained
to have accrued, four-fifths have been apportioned
among the Assured, by the participating scale, for
the whole term of Life, of one or more year's stand-
ing, in proportion to the premiums paid by each;
and appropriated, at the option of the Assured,
either as a Reversionary Bonus, payable when the
Policy becomes a claim, or its value applied to the
reduction of subsequent premiums. The reversionary
Bonus averages 31 per Cent. on the premiums paid
during the last five years. The equivalent reduction
of premium averages nearly 17 per Cent. on the
annual premiums payable during the next five years.
It is worthy of notice, that the profits of the Life
Assurance Fund are not subject to any diminution
from payment of interest to Proprietors.

A liberal sum will be given for the surrender of
the Company's Policies, whenever the objects for
which they were effected be accomplished.

Tables and every information can be obtained at the
Office of
