**GUANO v. MANURE.**—On reading the report of trial made with Guano and Stable Manure, on a crop of Swedes, at the late dinner of the Agricultural Society, by Mr. Nicholas Le Beir, Secretary of the Guernsey Royal Agricultural Society, could not be surprised at the result in favor of Guano, and which I calculate as follows:

STABLE MANURE.	
15 Tons, at 4s. each, per English Acre,...	£3 0
Cartage of Manure at 1s. per Ton,.....	0 15
Labour of spreading Manure, Three Men's days work, at 1s. 8d. each,.....	0 5
Total,.....	£4 0
GUANO.	
150 lb. Guano at 10s. per cwt. 20 15 0	
Cartage and labour of spreading, 1 0	
Total,.....	£17 15 0

To which add the difference of the crop in favour of Guano, say 6 tons 2 cwt. Swede Turnips, at 15s. per Ton,..... 4 11 0

Total in favour of Guano,..... £7 15 0  
 Per English Acre, or £3 2s. per Vergee, one third more than the yearly rental of the land. Surely with such a golden return our Farmers can no longer be blind to the value and almost miraculous fertilizing qualities of Guano.
