Wilmot Smith Liverpool
March 10.

Electro Plating and Gilding.
ONE of the most beautiful and useful discoveries of modern science, is that of Plating and Gilding by Voltaic Electricity; by which, all articles of worn-out Plated-ware can be so strongly and permanently replated, as to render them equal to new, as about one-fourth the original cost; as likewise Brass Candelabras, Lamps, Lustres, Bronzes, Argentine Spoons and Forks, may be so strongly covered with fine silver, as to make them equal to solid silver for use and durability.

RICHARD W. SMITH, of 24, Grafton-street, Dublin, most respectfully takes leave to inform the Nobility and Gentry, that he will be in Limerick for the next ten days; when all articles intrusted to him shall be promptly and expeditiously executed at Mr. RICHARD WALLACE'S, 125, George-street, where articles having undergone the process can be inspected.

R. W. SMITH will on application duly require an estimate for the execution of their work.

R. W. Smith
