 near Plymouth, Reginald Treby Clark,
 R.N.
 Sparrow, Esq., M.D., R.N., of Dover House,
 New Zealand, John Cowan Meccredy, Esq.,
 son of Robert Dene Meccredy, Esq., of
 county Down.

impregnated with imperishable Bitumen, and
 thoroughly compressed, that it is rendered impervious
 to rain, snow, or wind, and, therefore, well adapted
 for covering houses of every description, at less than
 half the cost of Slate.
 The Felt being light, the rafters and sheeting of a
 roof need not be stronger than what are requisite to
 carry the workmen engaged in the erection.
 The great advantages of our Felt are—
**Cheapness, Lightness, Ease of Application, and
 Durability.**

By using our
 "Circular," or "Bow-and-String Girder Roof"
 spaces of sixty feet and upwards, free from centre
 supports, can be quickly, cheaply, and effectually
 covered, making a handsome roof, admirably adapted
 for Manufacteries, Grain and Straw Yards, Railway
 Sheds, &c., &c. We have erected many of these
 light and graceful roofs, upwards of 50 feet span, with
 perfect success, and can with confidence refer to those
 parties for whom they were executed.

A Fresh Supply of the
BROWN INODOROUS FELT,
 For Lining Damp Walls in place of Lead, and ex-
 tensively used for Lining Iron and Zinc Houses, so
 as to prevent Radiation of Heat.
 MANUFACTURED expressly for that purpose, and satu-
 rated with waterproof materials, free from offensive
 smell, has been found the cheapest and most effectual
 method of preventing paper from being injured by
 moisture. It merely requires to be nailed to the wall,
 with tinned tacks, placed from eight to ten inches
 apart over the whole surface, the edges being closely
 laid together—paper may then be applied in the or-
 dinary manner, without the least hesitation.

FELT VARNISH,
 Price only 8d per Gallon,
 Specially Prepared
FOR COATING FELT ROOFS.
RITCHIE'S PATENT FIRELIGHTS.
