CORONER'S INQUEST.

Mr Mathew J. De Coursey, City Coroner, held an inquest in Barrington's Hospital yesterday on the body of John Heffernan, who died in that institution on the 8th instant from the effects of injuries which he received in a quarrel last Sunday night.

Patrick Heffernan, father of deceased, deposed—My son was in his usual good health when he left my house on Sunday night last at 6.30; never knew him to have a quarrel with any one.

Laurence McKeogh deposed—He was in Heffernan's company on Sunday night; saw him take off his coat to fight John Frawley, and separated both men; witness also saw a stone thrown, but could not say by whom.

John O'Brien said he was in the company of deceased on the night in question, but did not see any row take place between him and Frawley; witness saw deceased going towards Barrington's Hospital; he was bleeding; asked him what had happened, but he replied "nothing."

Dr. Holmes deposed—When he examined deceased on Sunday night he found him suffering from a wound over the temple and a compound fracture of the skull. He died from an abscess on the brain corresponding with the fracture of the skull.

The Coroner, addressing the jury, said that the evidence produced did not prove how the deceased had received the injuries, from the effects of which he ultimately died; and, therefore, they ought to find a verdict in accordance with the medical testimony.

The jury found that the deceased died from an abscess on the brain, caused by the injuries he had received, and it did not appear how he had received those injuries.
