## CICK CHRONICLE.

ING, SEPTEMBER 18, 1886

introversy which is being etween Messrs. J. & J. and " the Congregated k" will, we trust, be prome good result—viz., that of mess of the system which his city. We have already tters on the subject, and our intain others. It seems that te building trade had a comnst the Messrs. HAYES, and d for that purpose in the e on the evening of the 10th alleged to have been comisrs. HAYES was that they ions on the Trades' rights" employing what are called It goes without saying that

the Dean; Hymn, No 279.

The Rev Doctor Crook, late pastor of Bedfordrow, is to preach there to-morrow, both morning and evening, and on Thursday evening next Doctor Crook is to deliver his lecture in the same place on Thomas Walsh, one of the early Methodist preachers, as appears by advertisement in another column. The admission to the lecture will be by ticket, 6d each.

It will be perceived by advertisement that the annual meeting of the Limerick Branch of the Irish Temperance League will be held on Monday evening next, in the Lecture Hall of the Protestant Young Men's Association. A deputation will address the meeting, the speakers including Mr James H. Raper, London, whose powers as a temperance orator have a world-wide reputation.

We regret to announce the death, which took place to-day at his residence, Knockaderry House, of Mr Thomas D'Arcy Evans, J.P., after a short illness. The deceased gentleman was an old and respected resident in the district of Newcastle West, where he possessed considerable landed property, and was highly esteemed for his private and public worth. Mr Evans was for many years a magistrate of the Newcastle Bench.

The Shannon Hotel, Castleconnell.—The following are the latest arrivals and departures:—Major and Mrs Butson, Eyre Court, Galway; Captain Arthur Huddurt, 1st Leinster Regt; Mr Wm G Julius Eyre, the Castle, Eyrecourt; Mrs Bluir Miller, Eyrecourt; Mr W. J. Eyre, Mr M. C. Woodlead, Yorkshire; Mr W. H. G. Eyre, Eyrecourt; Colonel and Mrs Smyth, the Misses N. and E. Ievers, Mr R. H. Moloney, Woolwich; Mr H. T. Badger, Pietermaritzburg, and Mrs F. Carpenter Rowe, London.

A very satisfactory change has taken place in the weather within the past few days, and harvesting operations are now being carried on in brilliant sunshine. A great deal of corn has been stocked in Limerick and Clare, and hay has been safely made up, though in some districts in the County Clare a considerable amount of it is still lying on the ground. There is every prospect that the propitious weather will continue, so that matters are favourable for the farmer whose position regarding his cereals threatened to be rather critical.

"Crown, Bar, and Bridge Work."-This is the title of a little work in which Mr Clifford, the well known dentist, explains to the public the latest and most successful methods Science has approved of to supply the loss of natural teeth by their best substitute. The system is most successfully practised in America, but has not hitherto been introduced into this country. Mr Clifford will find the public anxious to learn all about this new method of dentistry, for there are few who have not at one time or another found themselves compelled to resort to professional aid in preserving decayed or supplying artificial teeth when those presented by nature have failed to do their appointed task. The work is illustrated by many coloured plates, and without doubt Mr Clifford will be found fully competent to carry out in practice what he Why, at one time, the was sweeping every one sion out of his wayin Corcould dare venture to corpeople thought he was man, and had found business that others corback to his contract of Queenstown, he tendered and it was given to him men that followed deep sestimates from £36,000 paid for all this in the
