named Egan, who was supposed to have fallen  
over the embattlement of the Sarsfield Bridge  
some three weeks ago, and whose remains were  
not recovered until yesterday. After hearing the  
evidence of the several witnesses examined, the  
jury found a verdict to the effect that deceased  
came by his death from drowning, but added  
they considered the place where the occurrence  
is alleged to have taken place very unprotected,  
and considered a life buoy should be procured  
and the place "railed in."
