DRATH OF MR. DAVID D., LEABY (CHAIRMAN NEWCASTLE WEST UNION).—Mr David D Leahy, who filled the position of Chairman of the Newcastle West Board of Guardians for about five years successively, died on Thursday last at his residence at Abbeyfeale. Mr Leahy was only ailing for a short time, and news of his death was received with widespread regret. He was the oldest guardian at the Board, and perhaps one of the oldest in Ireland, being continually since 1841, or nearly fifty years, a representative of the Abbeyfeate Division. His funeral on Saturday was very largely attended. -Cor.

ME JORDAN AND HIS CONSTITUENDS .- Mr Jeremiah Jordan, M.P., has addressed another long letter to his West Clare constituents in reply to resolutions passed against him at National League meetings. He declares that the position is lamentable and heartrending, and almost sickens him into retiring from public life. Without Parnell there was difficulty, and with him there was disaster. If he retained the leadership, moderate and constitutional men would retire, and the Fenians, whom Mr Parnell had hitherto effaced and pushed back till his plan should have a chance, would come to the front, and the result would be coercion, eviction, and Emergencymen.

MR. PARNELL IN LIMERICK.—Mr Parnell, accompanied by Mr Pierce Mahony and Mr T Harrington, M P's, arrived here from Tralee on Sunday night on his way to the Limerick Junetion. At the terminus a number of people had assembled, but there was no organised demonstration, as it was not expected Mr Parnell would pass through, but those who were present cheered him warmly. In a short address Mr Parnell alluded to the Tralee demonstration, which, he said, in numbers and enthusiasm exceeded the experience of any man. There was no disunion or dissension, and at every station on his return to Limerick there were crowds to meet him. As the train left for the Junction cheers were

The office staff an Messrs Cleave are giving their help in ca on the work, and the usual supply of milk-4,000 gallons per day at this season is taken in, in such a manner that no inconve is caused to the farmers. The milk is set in the ordinary way, and none of it is th damaged.
