

THE LIMERICK CHRONICLE

is a cricket match to-morrow and Limerick v. Co Cork; play to commence after arrival of 1.20 p.m. train

Mr. J. J. Morris, Millview, Ennis, has been appointed magistrate for the County Clare, and on Friday last, before Mr. H. de L.

The Field Battery, Royal Artillery, is to march from Fermoy to Limerick and the Field Battery on the same day from Limerick to Fermoy.

The Bishop of Limerick purposes holding his visitation of the diocese of Ardferd and Aghadath, at Killarney, and the Diocesan Synod on the previous day in Tralee.

At the Police Court this morning. An old woman named Kate Moroney was charged by the police with drunkenness and disorderly conduct in default of paying 40s and costs and was ordered to be imprisoned for one month.

At the Harbours Board.—The "Erin-Go-Bragh" is engaged in dredging in the Floating Harbour. At present there are only two vessels engaged in these being the "Antoinette" and the "Christiana," with timber for Messrs. Sons.

At the Harbours Board.—A meeting of the Harbours Board was convened for yesterday afternoon. Five members, not having attended, the business could not be done. Present—Messrs W. Spillane, D. L.; T. P.; E. B. Clevee, and J. F. Power. As fifteen members on the board there was much difficulty in a quorum and yet for some time past three or four have fallen through. Perhaps if sessions were held, as formerly, their meetings, like every other board in the city, might soon be got over. It would be worth a trial at all events.

STRIKE AT THE CLOTHING FACTORY.

Afternoon the employees of the clothing factory left off work because of their misunderstanding with regard to the appointment of a viewer or inspector named Ivers. The present manager, Mr. Taylor, says the suspension took place owing to his doing bad work. He had been cautioned several weeks ago against passing uncorrected work, but finding that he had continued to do so he suspended until fresh arrangements were made for the inspection of the work.

ELECTRIC LIGHTING IN LIMERICK.

You give a clear outline of the proposed means of installing the new light, and some idea of its relative cost as compared with that of our present gas illumination. But I regret to say that that relative cost of the new light appears to be absolutely prohibitive of its introduction. If we are to pay 2840 a year for the lighting of some
