The unanswerable arguments against the ant system have been put forward for over and twenty years. The late Alderman Coun, arguing from a financial, social, and moral p: int convincingly proved, that the Lime-Night Watch, while they were a heavy tax he overburdened ratepayers, failed to be tive. As occurred on yesterday, the prover- "red herring" was imported by some good red gentlemen, and we are threatened with a etuation of the system, which is unknown in any other part of the Kingdom.

THE REPRESENTATION OF LIMERICK.

A London correspondent writes:—"No pros- pect appears of a fresh election for Limerick. The Parnellites have decided not to apply for a writ on the ground that they do not wish to pose as being anxious to turn John Daly out of the city representation. From their point of view, opposed to fact though it be, John Daly is still member for Limerick, and they have no intention of disturbing his claim to be member. The Antis have no desire either to be thought anxious to fill up the vacancy, and there it remains."

"In regard to the vacancy at Limerick," writes another correspondent, "it is stated that, al- though the Government are not disposed to assist the issue of a new writ a section of the
