"CAN'T YOU GUESS?" A handsome reputation of this oil painting sent post free to buttermakers sending us the addresses of at least other buttermakers not using a cream separator. Thousands of buttermakers still continue to employ old-fashioned methods, and thereby at least 1 lb. of butter in every 6. The Melotte turns one-third easier than other separators: the largest sale in the United Kingdom; beaten all others in competition, and is free trial for 14 days by the Melotte Separator Sales Co., Ltd., Bristol. It pays to sell and buy a Melotte: the same quantity of butter will be made, and the cows feed and the need of making and attending to it will be saved.
