

**NEW PRUNER.**

two links to a pin similarly these slots and secured to a between the plates at the cutter-head. This construction in our detail view of the connects the outer end of operating lever at the lower e. By moving the operating shears will be opened as shown illustration. The shearing le to close down between the onary jaw, by swinging the inward to the position shown. It will be observed that this ds a compound leverage for shear blades, which is very the shears may be worked with limbs of trees or shrubbery be sive labour.

**PLANTS IN THE OPEN AIR.**

deferred from growing tomatoes not got sunny walls, says a *Illustrated*. If they have got in the garden, where the sun's i the plants from early morning foon, they will probably get y nearly as early as those on get the light and air all round. The great thing is to have s that are ready to flower at ed out in May. I find they do too light or loose, but make ood, and produce more flower er firm soil, not over rich in s best applied after the fruit d swelling; then, if the weather liquid manure can be applied I have tried a good many sorts, of All and Ham Green, and find tely-sized, smooth-skinned sort nder glass is equally good for f the plants are set out about a rained with one stem to a stout stopped as soon as half-a-dozen fruit have set, there is little g a good crop. If August and very hot, do not defoliate more ry, for many growers err in aves as if they were of no use. s a great mistake.
