Witness arrested warrants and in his possession found 15s.
 Mr. Hickson said the offence of victimising sailors was becoming very common recently. Only a week ago a foreign sailor was robbed of £11 and his boots. When sailors come into port after a long voyage they usually get intoxicated, and were surrounded by men of Wallace's class and robbed. That was becoming very common and the magistrates were determined to put it down.

The accused pleaded not guilty and was returned for trial to the next Quarter Sessions, an application for bail by his solicitor, Mr. Nash, being refused.

Mr. Nash—He is entitled to bail. Your action looks like finding him guilty before he has been convicted.

Mr. Hickson—That remains to be proved. It is a little proposition in Euclid. We refuse to admit him to bail.

Patrick and Joseph Horgan, brothers, were charged on Monday with the larceny of £11 and a pair of boots from a seaman named Louis Montecosteque on the 26th inst.

Mr. Enright defended. The accused admitted the charge and were sent to gaol for two months each with hard labour.
