## ATE CARPET-BEATING.

want—that of an improvement on  
ntiquated method of carpet-beating  
supplied in the city by Mr. A.  
Henry-street. Up to this, house-  
been greatly inconvenienced by  
f beating with the hand—a tedious  
doubt—and the result was that  
leaving Limerick for Cork, Dublin,  
where Orr's patent beaters have  
lled, now for some years.  
as this meant to the city annually,  
sing friend determined to give  
e advantage of a new idea, which  
and so far with very satisfactory  
s. At an initial outlay of £200  
has set up in Dixon's Lane one of  
carpet beating machines, said to  
t effective, best, and safest process  
yet invented. The apparatus is  
the attendants only having  
one edge of the carpet, when it is  
n by the action of the beaters over  
spring bed, thus doing away with  
ous method of pinning carpets to  
some other machines. The beaters  
n and pliable, and give even and  
rokes the whole length of the  
the number of 629 per minute. An  
f the capacity of the machine is  
ed in the fact that a carpet containing  
can be cleaned in five minutes at  
erate cost. In addition to the boon  
on those whose concern is the avoid-  
st-laden carpets in their homes, the  
n its own small way, will be the  
giving an impetus to local labour.  
A. Wyld has four men constantly  
connexion with the machine.
