Thomas, of did not stay where he was till his captors ed, nor did he turn up at the City Police yesterday when the story was told. When s turn up he will have to pay 40s. or spend th in gaol.

**KRIS'S MACHINE-MADE BREAD**

statement. There are people who think that are indigestible, and that they are likely to disturbance in the intestines. This is a matic. If any inconvenience has ever been is certain that the fault is not in the currants, but in the method of preparation. It is not likely that anyone in his or her senses would currants without chewing or chopping them. In this way currants are delicious and of rich nourishment. They render an infinity of dishes more palatable than they otherwise would be. But the most important of all facts about them are, firstly, that they supply the body with muscle building and nerve sustaining material in form ready for digestion and absorption—ready to go to work, so to speak. Again the delicious balance of sugar and acid in the currant makes them palatable, and palatability in food means itself not more of its value. All the currants sent in this country are seedless and without stalks, so that they may be eaten raw or cooked with safety and advantage. Properly prepared, currants are of the greatest value as food for children, and those who must live on a "diet," because the fruit gives the full nourishment required by the body without putting any tax on the organs of diges- tion. Currants should really be eaten every day. There is a maxim, "An apple a day, no doctor to pay." Currants contain all the beneficial elements of the apple, but in greater proportion. In Greece they appear on the table at every meal, and the men and women of Greece are noted for their health, hardihood and long life.
