

...at, Co. Mayo, desire to express our regret at losing such an efficient and zealous officer; but at the same time we congratulate Mr. Morley on being appointed to such an important district; while here for the past eight years or so Mr. Morley discharged his duty to our satisfaction, and by his forbearance and gentlemanly manner endeared himself to all with whom he came in contact.

We wish Mr. Morley every happiness and success in his new district.

We direct the Clerk of the Petty Sessions to forward copies of this resolution to the Inspector General, County Inspector and to Mr. Morley, and record it in the minutes of the Petty Sessions."

THOMAS BUTLER, J.P., Chairman.

JOHN CORNELLIE, J.P.

10th December, 1937.

R. I. CONSTABULARY.

Head Constable Walsh, who has been in charge of John street district for the past three years, having been previously stationed at Adare has been transferred to Belfast whither he will leave towards the end of the present month. He will be succeeded here by Head Constable Leahy, Castlepollard, Co. Westmeath. Head Constable Walshe is a most efficient and courteous officer, and his departure from Limerick has been heard of with much regret by the members of the force serving under him as well as the citizens generally.

DEATH OF MR. F. W. ALLEN

We observe the announcement of the death, which will be heard of by many old friends in Limerick with great regret, of Mr. F. W. Allen, which took place at his residence, Ballintemple. Mr. Allen, who was a member of a very old Cork family, began his business career in the Munster and Leinster Bank, and became manager at Limerick of that institution. He resigned this position about the year 1886 and became a stockbroker in Cork, in which business he was largely engaged. Mr Allen was greatly respected, and well recognized, as a gentleman thoroughly honourable in all his dealings, and earned the respect and esteem of a wide circle of friends. His death has taken place after a comparatively short illness, and much sympathy will be felt for his widow and children in the bereavement they have sustained.

WORKHOUSE CHILDREN'S TREAT.

It has been said that the children are monarchs at Xmas, a saying that even holds good within the walls of a workhouse, where things are inclined to be monotonous and desolate. Thanks to the bounteous generosity of Mrs. Hickson, Whitehall, the children of the Limerick Union were made happy and contented for a few hours last evening. From three until six she entertained about two hundred little ones in the Men's Dining Hall, which lost its prosaic appearance for the nonce, and looked as cheerful and bright as one would wish for. The children were served with dainty cups of tea, sweet cake, buns, and fruit, under the personal supervision of Mrs. Hickson, who was assisted by her daughter, Miss Hickson, Very Rev. Dean O'Brien, Mrs. O'Brien, Miss Barrington, P.L.G., Mrs. O'Brien, P.L.G., Mrs. Timmarsh, Rev. R. A.

...pleasures of the brilliancy of life in Mr Babylon. A nature entirely opposed to of the Rev. John Storm, Miss Scudamore invested it with a grace and of manner—vivacity, yet relieved by gent feeling and pathos—which made her exte popular with the house. Her impersonation a very brilliant one, and won for her hearty frequent rounds of applause. Mr. Edward as "Father Lamplugh," Mr. John J. Hook "Archdeacon Wealthy," Mr. P. Gedge Tw as "Lord Robert Vere," and Mr. Wilfrid N "Heratio Drake," filled their respective most capably. Miss Dorothy Milne as "Love," and Miss Molly Hayden as "Callender" were also most successful. All other roles in a numerous caste were excell sustained.

"The Christian" will be repeated to and to-morrow evening, and we should str advise all who appreciate a play that will looking into and thinking about, well stage splendidly acted, not to miss seeing "Christian."

HINTS FOR THE HOME

CARE OF THE NAILS.

Nails that break can be treated so that will keep their texture. Each night should have a little glycerine and rose-rubbed into them; the proportion is half and half. If glycerine does not with the skin, the nail can be treated vaseline and almond oil, half and half, can be massaged into the cuticle. This surely strengthen the nail and keep it cracking. If the nails are too pale they be tinted by massage. If they are mass every night from the tip to the base, will, in a short time, begin to be rosy, five minutes of this kind of work every will give back a rich return in the shap properly-coloured nails. Nails that are and rough can be smoothed by using the of pumice. A polisher is dipped in pumice and is then rubbed rapidly over nails. This removes all roughness and n them ready for the final polishing.

RESOURCEFULNESS AT HOME.

Never throw away empty cotton-reels; have a hundred uses. In most kitchens is a row of nails on which aprons and cloths are hung, with the result that they frequently torn and rust-marked. This be prevented if you force on each nail of your empty reels; nothing could make a useful peg. A reel will make an exce stop to prevent the door from opening to and banging the furniture. Cover the with thick cloth, to prevent its injuring varnish of the door, and screw it firm the flooring in the position required. (enough one finds the door of a cupboard vided with no better means of opening th keyhole. You can make an effective kno screwing on another of those ever-useful

GROWING OAK TREES IN GLASS.

A young oak tree growing in a glass or of water is not only ornamental, but int ing Place an acorn suspended by a th with a fin. of the surface of the water. it remain undisturbed for a couple of mo save for the filling up of the vessel to re evaporation, and an occasional com change of the water by a syphon. The will throw a root down into the water, and will shoot a tender stem with
