notised by that subservience to domineering authority in which he has been trained from childhood, the German accepts, as if it were a genuinely apontaneous product of his own mind, the "opinion" which has been created" by processes with which its dupes are familiar. As long as the militarist caste retains effective dominance Germany, Germany's neighbours will always stand in danger of having "public opinion" in the Fatherland mobilised against them by fetions and ealumnies, and skilfully goaded aggressiveness. European peace will never be established on a firm foundation till the power of the class which uses the German public as a tool of its ambitions is finally broken.
