## A WORD FOR THE POCKET WATCH.

**I**N spite of the popularity of the Wrist Watch which the war brought to its zenith, there is still much to be said for the old style "pocket watch." Being more protected, it has a "longer life," and being larger it can be regulated more accurately. All our pocket watches are adjusted to within a few seconds a week. They maintain this accuracy for years. This reliable movement may be had in any style of case—gold, silver or metal, according to the requirements of purchasers. But we cannot impress too strongly the advisability of buying a case that will properly protect the mechanism from dust and damp.
