the Technical Education to-day in the Municipality. The President, occupied the stage again a large attendance.

Mr. Pett, Assistant Sec. to the Council, needed that nominations for members of the Council be forthwith.

He opened the session with a report on the electricity supply. For the last five years he had seen everybody else had to say and what they hoped had been terrible pessimists. He favoured optimism. The Shannon under test about September all went well through the Saorstát in the early winter of 1929. The return of the Shannon from Dr McLaughlin some from the agricultural the cities, towns, and the towns and villages light under the Shannon networks would be connected to the meters and shops of the company capital charge to the public was not possible at the time these charges, but it was a fundamental idea that charges as would be made must be such as a reasonable period ensure the he invested capital. The plan on the business idea, and a philanthropic one. Electricity is such as would make the a self-supporting proposition burden on the taxpayer. No one be asked to buy current for Ireland, for the love of the any other idea than for the pocket. Electricity would be lighting at a lower rate than get equivalent lighting and oil. Similarly, for purposes an economic price could be arrived at, and in electricity had no rival. With power consumers electricity on the same basis. Shannon would lessen drudgery in the city, and on the farm. No should do the work a machine
