RYING STATISTICS.

ual report issued by the Statistics Bureau indicates ess in various directions e number of participating er, declined, as there were creameries, or 67 per cent erative creameries in the the figures for 1928 were cent, respectively. The he principal averages for of members per creamery, ows per creamery, 1,025; per cow (gallons), 648.8; r, 1s 7d; net receipts per milk used to make 1 lb The figures show an all he fat yield in the milk greater than it was thirty enormous development in

Council will have a campaign against long skirts, as such garments are all against the ideas of the Council. I do not mean that we admire very short skirts, but there is a happy mean. If we are going to trail about the floor copies of the early Victorian trains, a good deal of the work of this Council will go to the wall."

Dame Louise McLroy, Professor of Obstetrics and Gynæcology at the Royal Free Hospital, London, and a native of Ballycastle, made this declaration at a luncheon of the Health and Cleanliness Council at the Hotel Cecil, London.

"Do not pin your faith to antiseptics and disinfectives," she continued. "We must get down to soap and water."

Speaking of the work of the child welfare campaign, Dame Louise said the whole of that movement rested on cleanliness. Dirt led to disease, and disease to pain.

DEATH OF SIR HENRY B. LEFROY.

Descendant of an Old Limerick Family.

"The Times" announces the death of the Hon. Sir Henry Lefroy, formerly Agent-General for Western Australia, a few days before the end of his seventy-fifth year.

Henry Bruce Lefroy was born at Perth on March 24, 1854, the eldest son of the Hon. Anthony O'Grady Lefroy, C.M.G., great-grandson of De Courcy The O'Grady, and of Colonel Anthony Lefroy, 9th Light Dragoons, and grand-nephew of the late Lord Chief Justice Lefroy and Viscount Guillamore, all of County Limerick, who was for 36 years Colonial Treasurer of Western Australia. He came to England to go to Rugby School, and returned to Western Australia where he became a squatter. After serving in local administration, he entered the Legislative Assembly in 1892, and sat till 1901, and again from 1911 to 1921. In 1895-'97 he was a member of the Federal Council of Australasia. He was Minister of Education in 1897-'98, and Minister of Mines from 1898 to 1901. He was then appointed Agent-General in London, and held the post till 1904. From 1916 to 1919 he was Premier of Western Australia, and Minister for Lands and Agriculture. Sir Henry Lefroy—he was created C.M.G. in 1903, and advanced to the K.C.M.G. in 1919—was twice married, and had five sons and one daughter.

SUIT AND BOOTS "KIDNAPPED."

The Nelson statue in Tr is now illuminated nightly phosphorescent light. As from Whitehall the statue to be suspended in mid-air.

The illumination comes from one of the buildings in t is designed apparently to dr an electric sign.

An official at the Office of "There are special regulation Square, but there appears to them to preclude the Nel being used for advertising. this would contravene ord Law is another matter. In attention has not been drawn and, so far, no action is cont
