sumer—the average worker who has to  
be content with a regulated wage, just  
sufficient to meet ordinary demands.  
Because an article is Irish is no reason  
why a greatly enhanced price should be  
charged. Industrialists have a duty as  
well as a right imposed on them; it is to  
give the purchasing public a square deal  
and not to take undue advantage of war  
conditions and the disabilities which  
follow from being unable to procure  
supplies from abroad. Let them by all  
means have a reasonable margin of profit  
but nothing extravagant.

### NO SABBATH.

The Soviet Government didn't waste  
much time in imposing its anti Christian  
calendar on the part of Poland which has  
come temporarily under its jurisdiction.  
On Sunday a Moscow decree announced  
the abolition of the Sabbath, for which  
the Communistic "Free Day" has been  
substituted. Valiant Catholic Poland  
has endured the heel of the invader  
before, and has shook it off, and it  
doesn't require a prophet to tell us that  
the land of St. Stanislaus Kotska and  
Kosciusci will be rehabilitated, and re-  
gain her freedom. Until that day comes  
— and may it be soon — we must pray for  
her deliverance.
