

the privileges of the common trade unionists or common citizens.

Ten years ago celebrations were being held in honour of the "victory" of our "patriots" over the alleged forces of reaction, and a glorious prospect was being foreshadowed. The annuities were to be retained, land was to be relieved of rates, taxation reduced, a change-over in our farming methods and a re-distribution of holdings, and even factories in full steam, were all going to revolutionise life in this country. The little farmers' organisation of those days saw through the shams and traps and deceptions, and pointed out then the inevitable results.

But, perhaps, I have trespassed enough on your space on this occasion, Mr. Editor, so I will reserve my comments on the latest apology for a withdrawal of the offer—or shall I say a breach of faith?—in the matter of de-rating.

## DOES YOUR CHILD TAKE COLD EASILY?

It is the constipated child who falls an easy prey to infectious diseases. Constipation turns his body into a breeding ground for germs. Colds, coughs, catarrh, bronchitis and worse chest complaints are then easily caught, and all the time the child is constipated these complaints are getting a firmer grip. Therefore, if your child has a stubborn cold or cough, the first step to recovery is to make sure the little bowels act regularly. But, whatever you do, don't use a strong purgative that will act violently once or twice and then leave the bowels more bound than before.

The laxative most favoured and recommended by doctors and nurses is 'California Syrup of Figs'. They prefer it because they know it is safe and because, being a liquid laxative, the dose can be measured to a nicety to suit a child's system. And where can you find another laxative so natural and so safe. 'California Syrup of Figs' starts a natural movement which relieves the system of all the germ-breeding poisonous waste and breaks up a cold and cough when other remedies fail.

A weekly dose will ward off further attacks and children love the flavour.

Get a bottle of this ideal laxative to-day and be sure to ask for 'California Syrup of Figs' brand. 1/3 and 2/6. The larger size is the cheaper in the long run.
