Smokers' 'Fur'

How to detect it—How to prevent it

Try this now. Run your tongue round your mouth—do you notice it... a rough woolly feeling. Smokers' fur has got a hold, and is staining your teeth. But don't worry, you can stop this fur from ruining the look of your teeth.

Dentists know smokers' fur is caused by excess acid in the mouth. Kill the acid and you shift the fur. What is the scientific way to destroy mouth acid? 12,000 dentists say 'Milk of Magnesia' brand antacid is the most effective antacid known. They recommend smokers to use the toothpaste containing 'Milk of Magnesia'—the only toothpaste containing it—Phillips' Dental Magnesia.

Commence fighting mouth acid tonight. Get a tube of Phillips' Dental Magnesia and clean your teeth with it each night and morning. Then you'll feel the difference; no more morning mouth; no more stale breath. Instead you'll have teeth which look clean, feel clean, are clean; a sweet mouth to give new zest to smoking. A mouth that will say Good morning! and mean it.
