

## NEW USE FOR PIPE CLEANER

A correspondent writes:—Those who use patent cigarette and pipe lighters will overcome the trouble usually experienced owing to the wick in the lighters refusing to function, particularly in the open, if they substitute a piece of pipe-cleaner for the wick. The writer has tried this and found it much more satisfactory than was the case when using ordinary lighter-wick, and, as well, the pipe-cleaner lasts for an indefinite period. In the hope that others will benefit the suggestion is passed on.

## BAN LIFTED.

The ban on the ringing of church bells on Sundays in Britain will be lifted as from the coming week-end, Mr. Churchill announced in the British House of Commons yesterday.

In the house of Mary Dillon he found a ring. Mrs. Dillon said that the ring was given to her by Miss McCarthy's niece, while Nora Moloney said that she received clothing from her. Mrs. Moloney denied that the young girl brought any clothing to her house.

Mary Dillon said that Margaret McCarthy gave her a green coat and frock on one occasion, while her sister gave her a ring. She also gave her a jumper.

Nora Moloney said that she gave 4/- to the young girl for a number of articles of clothing which she gave her.

Mrs. Moloney said she did not know anything about the missing articles until Margaret McCarthy came and asked her about them.

The Justice said he would convict the three defendants of being in illegal possession of the articles and

to current rumour, that I have not received this sum, nor any portion of it. Neither has any effort, so far as I am aware, been made by the party concerned to meet what is obviously both a legal and a moral obligation. Thanking you, Mr. Editor, for allowing me space to clear up this matter—Yours sincerely,

PHILIP LAWLOR, 3 Park View Terrace, Limerick.
