## DEATH OF MRS. T. W. O'CONNOR, KILKEE

We sincerely regret to announce the death of Mrs. Tadhg O'Connor (nee Manning), which took place on the 1st inst. at her residence, St. Senan's Terrace, Kilkee, Co. Clare. Her death, which was unexpected, came as a great shock to her many friends and relations in Dublin and Galway and in the West of Ireland in general. Her charming manner and personality, combined with her unassuming disposition, won the hearts of all those who ever met her. All lovers of the mother-tongue will regret the early demise of an outstanding Irish scholar and one who had the ideals of an Irish-Ireland very much at heart.

A native of Ballyferriter, Dingle, Co. Kerry, where she received her early education through the medium of the Irish tongue, and who later graduated with distinction at University College, Galway, she ably assisted in compiling Father McKenna's English-Irish Dictionary over a period of three years. Subsequently, and until her marriage to Mr. Tadhg O'Connor, of the Department of Agriculture, she taught at St. Xavier's Convent Secondary School, Kilrush, Co. Clare. Her results whilst engaged in the teaching profession testified to her ability as a teacher.

On the 2nd inst. the remains were removed (by road) to Ballyferriter Parish Church. Rev. D. McCarthy, C.C.; Rev. Father Daly, C.S.Sp.; Rev. Father O'Neill, C.S.Sp., together with a large concourse of people, met the funeral near Abbeyfeale—deceased's husband's native district—and accompanied the remains portion of the journey to Dingle. After Solemn Requiem Mass the following day, the burial took place at Dunurlin Cemetery, Ballyferriter. An immense gathering of friends and relations from Kerry, Cork and Limerick paid the last tribute at the graveside. Rev. Father O'Connell was celebrant at the High Mass; Rev. Father Moriarty (cousin), deacon; Rev. Father Murphy, C.C., subdeacon. Over 20 priests, many personal friends of the deceased, attended the funeral.

The chief mourners were—T. W. O'Connor (husband); Mrs. Ellen Manning, Teeravane (mother); Mrs. L. Cousins, N.T. (sister); Rev. J. Manning and Rev. M. Manning, Iowa, U.S.A.; Michael, Teeravane; Denis and Tadhg (Gardai Siohana, Galway), and Brendan (brothers); Mother M. William and Mother M. Anastasia (England), Brenda O'Connor (Eire High Commissioner's Office, London); Mrs. Collins, Cahir Hayes and Mrs. M. Manning, Teeravane (sisters-in-law); L. Cousins, N.T., Kenmare; P. W. O'Connor and W. W. O'Connor (brothers-in-law); Mother M. William (sister-in-law), England.

## TURF IN GAS PRODUCERS

Lorries run by gas producer apparatus in which raw turf, or any raw carboniferous material, is the fuel, and which consumes only two lbs. of fuel to the mile, are being

flannels in lukewarm water to soak, having the napkins in one tub and the dresses in another. After they have soaked an hour or two, rub them out and place them in hot suds, made with soft water and yellow soap. A strong soap should never touch anything that comes in contact with the baby's skin, as it is almost impossible to rinse it all out, and what remains will irritate the tender flesh, causing him to suffer torture. Put them in a boiler and allow them to scald for a few minutes. Dip them in clear water, rinse thoroughly through one blueing water, and dip the lower parts of the skirts and dresses in thin starch. Do not starch the bodice or sleeves, even of best dresses, for it will irritate the tender flesh. If indoor drying is a necessity, see that it is quick and thorough.

## STITCHES IN TIME.

Household linen, apart from towels, in many cases comes last on the list for repairs and attention. I would venture, therefore, to give the following hints regarding sheets and pillow-cases:—

Mend any tears in an article before it is sent to the laundry.

When patching old sheets, do not use new material. Patch with the sound parts of other old sheets.

Double-bed size sheets which wear thin in the middle can be cut down the centre and hemmed and used for smaller beds, or cot sheets.

When a pillow-case seems too thin to be worth repair, quilt the two sides together by stitching across and across diagonally on the machine and make a new back from another piece of material.

Do not keep your linen in a hot cupboard once it is aired, as heat discolours and weakens the material.

Use sheets and pillow-cases in rotation. The easiest way of doing this is to put the newly-washed linen at the bottom of the pile and take the articles you are about to use from the top.

If you are storing linen, keep it in a dry, cool place.

Make a practice of looking over all household linen before it goes to the laundry basket, and remember the old adage "A stitch in time saves nine."

## FRUIT EATING.

At all times of the year, fruit should be regarded as Nature's best laxative for human beings. Some kinds of fruit, of course, are more beneficial in their influence than others. The apple heads the list of blood-purifiers, and its effects are good whether it be raw or cooked, though the former condition is, perhaps, to be preferred. This is due to the juice possessing certain qualities of a purifying character, which prevent fermentation in the stomach, and have an anti-septic action as well. Hence the value of a raw apple eaten upon an empty stomach before breakfast.

## SOME PRACTICAL HINTS.

When your tin of silver polish is empty, fill it half full with methylated spirits and shake well. You will be amazed at the amount of polish that you now have in the tin, and, incidentally, it gives a shine equal to, if not better than, the original polish.

Apply immediately to burns a paste of bicarbonate of soda and vinegar and bandage. This takes out all the sting of a burn and prevents blisters forming. It is possible with only a slight burn to omit the bandage if the part affected is liberally soaked with vinegar and the bicarbonate just
