Take herbaceous plants and chrysanthemums. Dig up and transplant daffodil bulbs that require shifting. Prick out wall-flowers, forget-me-nots, double daisies, Brompton stocks, etc., into a nursery bed. Leave them 4 inches apart in lines 10 inches asunder. Dry off Arum lilies to prepare them for re-potting next month.

Pot off cinerarias and primula obconicus into 5, 6 and 7 inch pots and grow on in a cold frame facing the north.

Roses must be kept free of aphids by frequent sprayings or dustings with Derris powder. Rose and fruit stocks may be budded now.

The faded flowers of bush roses should be constantly picked off to keep the beds tidy and encourage more flowers. The same may be said for sweet pea.

As soon as the flowers have faded on early rambler roses the old flowering shoots should be pruned off and the young shoots tied in to take their place.

YOUR KIDNEYS, like all filters, get partially clogged at times. When this takes place, uric acid and harmful wastes may collect in the blood. These poisons attack your weak spots and so you are tortured by backache, urinary and bladder trouble, gravel, disturbed nights, stiff aching muscles and joints, rheumatic pains or lumbago.

Take Doan's Backache Kidney Pills. They will stimulate the kidney filters, enabling them to rid the system of poisonous impurities which have caused your distress.

Worrying won't help you, but Doan's Pills probably can. Why not take them now?
