HIGH TRIBUTE TO GUARD

"I would like very definitely and strongly to commend the conduct of Guard E. Morrissey in very difficult circumstances for himself, and would like very much to bring it to the notice of the authorities," said District Justice Gleeson at Ennis when dealing with a case of drunkenness and disorderly conduct. "I think," added the Justice, "that he acted with great tact and a considerable degree of acumen like a good peace officer, and prevented what might have had very serious consequences both to the defendant and other people. It is not often I go out of my way to compliment Guards on the discharge of their duty, which they do very well, but I think this is a particular case, and I do so with great pleasure."

(Guard Morrissey intervened to prevent a man under the influence of drink from driving a horse and trap through a main street in Ennis, and, although provoked by the resentful attitude of the man, exercised considerable restraint.)
